Assault Weapons ....................................................................................................................... 1
Myth: Assault weapons are a serious problem in the U.S. ............................................................ 1
Myth: Assault weapons are used in mass public shootings ........................................................ 2
Myth: Every 48 hours, an assault rifle is traced to crime in Maryland .......................................... 3
Myth: One out of five police officers killed are killed with assault weapons ............................. 3
Myth: Assault weapons are favored by criminals ................................................................. 3
Myth: Assault weapons can be easily converted to machine guns ............................................. 4
Myth: Assault weapons are used in 16% of homicides ............................................................. 4
Myth: The 1994 (former) Federal Assault Weapons Ban was effective .................................... 5
Myth: States need to ban assault weapons .............................................................................. 5
Myth: Assault weapons have only one purpose, to kill large numbers of people ..................... 6
Myth: Nobody needs an assault weapon .................................................................................. 6

Children and Guns ................................................................................................................... 7
Myth: There have been 96 school shootings since Sandy Hook .............................................. 7
Myth: 13 children are killed each day by guns ......................................................................... 7
Myth: More Guns in U.S. Homes, More Kids Getting Shot .................................................... 8
Myth: Schoolyard shootings are an epidemic ......................................................................... 8
Myth: Trigger locks will keep children from accidentally shooting themselves .................... 10
Myth: Guns in America spark youth violence ........................................................................... 10
Myth: More than 1,300 children commit suicide with guns ................................................... 11
Myth: Stricter gun control laws could have prevented the Columbine massacre ..................... 12
Myth: Children should be kept away from guns for their own safety ...................................... 12
Myth: More children are shot and killed in the U.S. than anywhere else ................................ 13
Myth: More children are hurt with guns than by any other means ........................................... 13
Myth: If it saves the life of one child, it is worth it ................................................................... 14

Availability Of Guns .................................................................................................................. 15
Myth: The availability of guns causes crime ............................................................................ 15
Myth: Gun availability increases suicide rates ........................................................................ 17
Myth: Gun availability is what is causing school shootings .................................................... 17
Myth: Gun availability leads to massacres ............................................................................. 18
Myth: Gun ownership is linked to higher homicide rates ....................................................... 18
Myth: Handguns are 43 times more likely to kill a family member than a criminal ................ 18
Crime And Guns ................................................................. 19
Myth: Guns are not a good deterrent to crime .............................................................. 19
Myth: Private guns are used to commit violent crimes .................................................. 21
Myth: 40% of Americans have been or personally know a gun violence victim .......... 21
Myth: Interstate transportation of guns defeats local gun control ............................... 22
Myth: High capacity, semi-automatics are preferred by criminals .............................. 22
Myth: Banning “Saturday Night Specials” reduces crime ............................................. 22
Myth: Criminals prefer “Saturday Night Specials” ....................................................... 22
Myth: Gun shows are supermarkets for criminals ....................................................... 23
Myth: All four guns used at Columbine were bought at gun shows ......................... 24
Myth: 25-50% of the vendors at most gun shows are “unlicensed dealers” ............... 24
Myth: Regulation of gun shows would reduce “straw sales” ...................................... 24
Myth: Prison isn't the answer to crime control ........................................................... 24
Myth: Waiting periods prevent rash crimes and reduce violent crime rates .............. 25
Myth: 86% of Americans, 82% of gun owners favor universal background checks ...... 26
Myth: Gun makers are selling plastic guns that slip through metal detectors .......... 26
Myth: Machine guns are favored by criminals ............................................................. 26
Myth: Corrupt dealers sell almost 60 percent of crime guns ........................................ 27

Mass Shootings ......................................................................... 28
Myth: Mass public shootings are increasing ............................................................... 28
Myth: More people are dying in mass public shootings ............................................. 29
Myth: America has the highest rate of mass shootings in developed countries ......... 29
Myth: Easy access to guns creates an incentive for mass public shootings .......... 29
Understanding conflicting reports on "mass public shootings" ................................... 30

Police And Guns ......................................................................... 32
Myth: Police favor gun control .................................................................................... 32
Myth: Police are our protection – people don't need guns ....................................... 32
Myth: The supply of guns is a danger to law enforcement ........................................ 33
Myth: “Cop Killer” bullets need to be banned ......................................................... 33
Myth: Teflon bullets are designed to penetrate police bullet-proof vests ............... 34

Guns And Crime Prevention ................................................................................. 35
Myth: Private ownership of guns is not effective in preventing crime ...................... 35
Myth: You are more likely to be injured or killed using a gun for self-defense ........ 36
Myth: Only police should have guns ........................................................................ 36
Myth: Guns are not effective in preventing crime against women ............................. 37

Concealed Carry ........................................................................ 39
Myth: Concealed carry doesn't prevent crimes ......................................................... 39
Myth: Concealed carry laws increase crime ............................................................. 40
Myth: Concealed carry permit holders shoot police ................................................. 41
Myth: People with concealed weapons licenses will commit crimes ....................... 41
Myth: 460 people have been killed by CCW permit holders .................................. 43
Myth: Concealed guns in bars will cause violence .................................................. 43
Myth: Texas CCW holders are arrested 66% more often ....................................... 43
Myth: CCWs will lead to mass public shootings ....................................................... 44
Myth: People do not need concealable weapons ................................................................. 45
Myth: Police and prosecutors are against concealed carrying by citizens .......................... 45

Licensing And Registration ................................................. 47
Myth: Other countries register guns to fight crime .............................................................. 47
Myth: Gun registration works ............................................................................................... 47
Myth: Gun registration will help police find suspects ......................................................... 49
Myth: Registration does not lead to confiscation ................................................................. 49
Myth: Licensing will keep bad people from obtaining or using guns .................................. 50
Myth: Guns from the U.S. create crime in other countries ................................................ 51

Accidental Deaths ............................................................. 52
Myth: Accidental gun fatalities are a serious problem ......................................................... 52
Myth: Handguns are unsafe and cause accidents ............................................................... 53
Myth: Innocent bystanders are often killed by guns .......................................................... 53
Myth: Citizens are too incompetent to use guns for protection ........................................ 53
Myth: Gun accidents are flooding emergency rooms ......................................................... 54
Myth: “Junk” guns are dangerous and should be banned ................................................... 54
Myth: Guns should be made to conform to product liability laws .................................... 54

Government Laws And Social Costs .................................... 55
Myth: Gun control reduces crime ......................................................................................... 55
Myth: California’s tough gun laws reduced gun deaths ...................................................... 56
Myth: Guns should be registered and licensed like cars .................................................... 57
Myth: The Brady Bill caused a decrease in gun homicides .............................................. 57
Myth: Gun laws are being enforced ................................................................................... 58
Myth: Federal gun crime prosecutions increased 25% ...................................................... 59
Myth: The social cost of gun violence is enormous ........................................................... 59
Myth: The social cost of gun violence is $20-100 billion .................................................. 60
Myth: Gun “buy back” programs get guns off the streets .................................................. 60
Myth: Closing down “kitchen table” gun dealers will reduce guns on the street .......... 61
Myth: Only the government should have guns ................................................................. 62
Myth: “Safe storage” laws protect people ......................................................................... 62
Myth: Local background checks reduce gun suicides ....................................................... 62

Microstamping ................................................................. 64
Myth: Independent testing by forensic technologists shows the technology is reliable .... 64
Myth: Filing the firing pin will make the gun inoperable .................................................... 64
Myth: The cost per firearm will be cheap ....................................................................... 65
Myth: The numbers will let police find the gun’s owner and help solve crimes ............ 65

Ballistic Fingerprinting .................................................. 66
Myth: Every firearm leaves a unique “fingerprint” that can pinpoint the firearm used ... 66
Myth: A database of ballistic profiles will allow police to trace gun crimes .................... 67
Myth: Ballistic imaging is used in Maryland and New York and solves many crimes .... 68
Myth: A ballistic database is inexpensive to create/maintain ....................................... 68
Myth: Police want a ballistic database ............................................................................ 68
50 CALIBER RIFLES ........................................................ 70
Myth: .50-calibers are the favorite weapon of terrorists................................. 70
Myth: American gun makers sold .50-calibers to terrorists............................ 70
Myth: .50-caliber shooters are terrorists in training ........................................ 70
Myth: The Founding Fathers would have had no use for a .50-caliber rifle ........ 71
Myth: .50-calibers are capable of piercing airline fuel tanks from a mile away 71
Myth: .50-caliber bullets can penetrate concrete bunkers ............................. 71
Myth: .50-caliber bullets can pierce light armor at 4 miles ............................. 71
Myth: .50-caliber rifles can knock a helicopter from the sky ....................... 72
Myth: .50-caliber guns are for snipers ......................................................... 72

GUNS IN OTHER COUNTRIES ............................................ 73
Myth: Countries with strict gun control have less crime .............................. 73
Myth: Britain has strict gun control and a low crime rate ............................. 75
Myth: Gun control in Australia is curbing crime .......................................... 78
Myth: Japan has strict gun control and a less violent society ....................... 79
Myth: Gun bans elsewhere work ................................................................. 79
Myth: The U.S. has the highest rate of firearm deaths among 25 high-income countries 79
Myth: The United States has the highest violence rate because of lax gun control 80
Myth: The United States is the source of 90% of drug syndicate guns in Mexico 80
Myth: Mexico seizes 2,000 guns a day from the United States ...................... 81
Myth: Thousands of guns go into Mexico from the U.S. every day ............... 81

PUBLIC OPINION ............................................................... 82
Myth: Gun owners are a tiny minority ............................................................ 82
Myth: People do not believe that the Second Amendment is an individual right 82
Myth: Most Americans favor gun control ..................................................... 83
Myth: Most people think guns in the home are dangerous ............................ 84
Myth: More and more Americans support stricter gun control ..................... 85
Myth: People want to ban handguns ............................................................... 85
Myth: People oppose concealed carry ........................................................ 85
Myth: People want local government to ban guns ........................................ 85

ASSORTED MYTHS ............................................................ 87
Myth: 30,000 people are killed with guns every year .................................... 87
Myth: Gun ownership is falling in the United States ................................... 87
Myth: The Brady Campaign has a good ranking system of state gun control laws 87
Myth: “Universal” background checks will reduce crime ............................ 87
Myth: 1,000 people die each day from guns ................................................. 88
Myth: High capacity magazines lead to more deadly shootings .................. 89
Myth: The “powerful gun industry” stops all gun control legislation .......... 90
Myth: Access to guns increases the risk of suicide ...................................... 90
Myth: Individuals who commit suicide are more likely to have had access to guns 90
Myth: The only purpose for a gun is to kill people ....................................... 91

SECOND AMENDMENT ......................................................... 92
Myth: The Supreme Court ruled the Second Amendment is not an individual right 92
Myth: The Second Amendment is a collective right, not an individual right ...... 92
**Introduction**

“The great enemy of the truth is very often not the lie: deliberate, continued, and dishonest; but the myth: persistent, persuasive, and unrealistic.”

– John F. Kennedy

**Purpose**

The goal of *Gun Facts* is to provide a quick reference guide on gun control issues. Use *Gun Facts* when composing arguments for debates, writing letters to editors, emailing to your representatives, and sending statements to the media.

The problem *Gun Facts* addresses is the lack of intellectual honesty within the gun control debates. Over many decades, some activists have presented “information” to the media and the public that is at best inaccurate and at worst fraudulent. *Gun Facts* is dedicated to debunking such myths and providing citable evidence.

Common gun control myths are listed in the pages that follow. For each myth, one or more facts are presented to refute the claim and the source of the information is fully cited.

**Copyright and free usage information**

This work is the copyrighted property of Guy Smith. All rights are reserved unless noted below.

**PDF:** The PDF version of this document may be freely distributed providing the document is not altered and that the source is always cited. “Reasonable use” laws apply, which basically means you can use small sections of *Gun Facts* without my prior consent. Written excerpts may be distributed as long as the URL [www.GunFacts.info](http://www.GunFacts.info) is identified as the location where the full document may be obtained.

**Printings:** You are also allowed to print this document for your personal reference and/or for distribution without fee (i.e., you can’t charge money for copies of *Gun Facts*). This means if you want to print copies for the media, elected officials, friends, etc. – you are free to do so. Any distribution in any format must include the entire work.

**Questions, corrections and suggestions**

If you need to communicate with the author, send an email to guy@GunFacts.info. Your corrections, comments, additions and suggestions are welcomed and encouraged. When providing new information, please cite the original reference in detail – publication, title, author, date, etc. This is essential.
Sources

All sources cited in this work are accurate to the best of our research. We use the most recent data that can be easily found, time permitting. If any more recent data is available, I welcome receiving the same. Do note there is a lag time between when we add information to the Gun Facts web site and when it appears in a new edition of this book.

Contributions

I accept non-tax-exempt donations to pay for the software, hardware, paper and ink used in composing, editing and distributing Gun Facts. If you would like to help, drop by www.PayPal.com and send your donations to guy@GunFacts.info.

Printed copies

A printed copy of the current version of Gun Facts can be acquired online at Amazon.com. Bulk orders at a discount can be arranged by emailing guy@GunFacts.info.

Acknowledgements

My sincere thanks go out to the following individuals or groups for their contributions to Gun Facts:

Jim Archer: Long ago Jim provided the domain www.GunFacts.info, so people can more easily find this work.

Mark, Aaron and Gary who volunteered to proofread this version of Gun Facts and thus obscured my own inabilities.

Pete McKay/McKayDesign: For the very professional front cover design.

The Research Volunteers: Over 600 people have registered to help in researching topics and specific items. I cannot list every volunteer, so I thank you collectively.

Jason G.: For originally recommending the myth/fact approach, which has proven to be absolutely the right way to present this information.
**Assault Weapons**

“Assault weapon” is an invented term. In the firearm lexicon, there is no such thing as an “assault weapon.”\(^1\) The closest relative is the “assault rifle,” which is a machine gun or “select fire” rifle that shoots rifle cartridges.\(^2\) In most cases, “assault weapons” are functionally identical though less powerful than hunting rifles, but they are *cosmetically* similar to military guns.

**Myth: Assault weapons are a serious problem in the U.S.**

**Fact:** In 1994, before the Federal “assault weapons ban,” you were eleven (11) times more likely to be beaten to death than to be killed by an “assault weapon.”\(^3\)

**Fact:** In the first 17 years since the ban was lifted, murders declined 43%, violent crime 43%, rapes 27% and robberies 49%.\(^4\)

**Fact:** Nationally, “assault weapons” were used in 1.4% of crimes involving firearms and 0.25% of all violent crime before the enactment of any national or state “assault weapons” ban. In many major urban areas (San Antonio, Mobile, Nashville, etc.) and some entire states (Maryland, New Jersey, etc.) the rate is less than 0.1%.\(^5\)

**Fact:** Even weapons misclassified as “assault weapons” (common in the former Federal and California “assault weapons” confiscations) are used in less than 1% of all homicides.\(^6\)

**Fact:** Police reports show that “assault weapons” are a non-problem.

For California:

- **Los Angeles:** In 1998, of 538 documented gun incidents, only one (0.2%) involved an “assault weapon.”
- **San Francisco:** In 1998, only 2.2% of confiscated weapons were “assault weapons.”

---

\(^1\) It is worth noting that there are numerous different ‘legal’ definitions of “assault weapons”. A report from the Legal Community Against Violence showed no fewer than eight jurisdictions, anywhere from 19 to 75 banned firearms, six differing generic classification schemes and several legal systems for banning more firearms without specific legislative action. In other words, an “assault weapon” is whatever a politician deems it to be.

\(^2\) *Small Arms Identification and Operations Guide, U.S. Department of Defense.* The exact statement from their manual is “short, compact, select-fire weapons that fires a cartridge intermediate in power between submachine gun and rifle cartridges.”

\(^3\) Based on death rates reported by CDC and FBI Uniform Crime Statistics and estimating from state-level reporting on the percent of crimes involving types of firearms

\(^6\) Based on state-level reporting from various states in 1993 during debates concerning the bill.
• **San Diego:** Between 1988 and 1990, only 0.3% of confiscated weapons were “assault weapons.”
• “I surveyed the firearms used in violent crimes...assault-type firearms were the least of our worries.”

For the rest of the nation:

• Between 1980 and 1994, only 2% of confiscated guns were “assault weapons.”
• Just under 2% of criminals that commit violent crimes used “assault weapons.”

**Fact:** Only 1.4% of recovered crime weapons are models covered under the 1994 “assault weapons” ban.

**Fact:** In Virginia, no surveyed inmates had carried an “assault weapon” during the commission of their last crime, despite 20% admitting that they had previously owned such weapons.

**Fact:** Most “assault weapons” have no more firepower or killing capacity than the average hunting rifle and “play a small role in overall violent crime.”

**Fact:** Even the government agrees. “... the weapons banned by this legislation [1994 Federal Assault Weapons ban - since repealed] were used only rarely in gun crimes”

**Myth: Assault weapons are used in mass public shootings**

**Fact:** A decade long study, covering 84 mass public shootings, found that pistols were used 60% of the time. Rifles were used 27% of the time. But that is all types of rifles, and so-called “assault weapons” (such as the AR-15 or AK-47) are a subset of these.

---

7 S.C. Helsley, Assistant Director DOJ Investigation and Enforcement Branch, California, October 31, 1988
9 *Targeting Guns*, Gary Kleck, Aldine Transaction, 1997, calculated from Bureau of Justice Statistics, assault weapon recovery rates
11 Criminal Justice Research Center, Department of Criminal Justice Services, 1994
14 *United States Active Shooter Events from 2000 to 2010: Training and Equipment Implications*, Advanced Law Enforcement Rapid Response Training (ALERRT),Texas State University, 2013
Myth: Every 48 hours, an assault rifle is traced to crime in Maryland

Fact: This claim by Cease Fire Maryland includes firearms never used in crimes. Some examples of firearms traced include:

- 47 firearms found at private residence of a person who passed-away from natural causes, and which were never used in any crime.
- Firearms temporarily taken from owners under court Emergency Evaluation Petitions (the firearms were not used in crimes, but the judge wanted them confiscated until other issues are resolved).

Fact: This claim lacks perspective. During the same time period there were 163,101 violent crimes reported in Maryland. Even if the Cease Fire Maryland data was correct, they have connected assault rifles to just 0.4% of violent crimes during the same period.

Myth: One out of five police officers killed are killed with assault weapons

Fact: This “study” included firearms not on the former Federal “assault weapons” list. By including various legal firearms, the report inflated the statistics nearly 100%.

Fact: Only 1% of police officers murdered were killed using “assault weapons.” They were twice as likely to be killed with their own handgun.

Fact: One 2006 federal government study found zero “assault weapons” were used to kill police officers.

Fact: Police don’t think it is a major problem, with 91% saying an assault weapons ban would have either no effect or a negative effect on violent crime.

Myth: Assault weapons are favored by criminals

Fact: Only 6% of criminals use anything that is classified (even incorrectly) as an “assault weapon” and fewer than 2.5% of criminal claimed to use these firearms when committing crimes.

---

15 This claim was made by the anti-gun Violence Policy Center in their 2003 report titled Officer Down
16 The “study” included legal models of the SKS, Ruger Mini-14, and M1-Carbine, which were all in circulation before the federal “assault weapons” ban and which were excluded from the ban.
17 Law Enforcement Officers Killed and Assaulted, FBI, 1994
18 Violent Encounters: A Study of Felonious Assaults on Our Nation’s Law Enforcement Officers, U.S. Department of Justice, August 2006
19 Gun Policy & Law Enforcement, PoliceOne, March 2013
**Fact:** Criminals are over five times more likely to carry single shot handguns as they are to carry “assault weapons.”**22**

**Fact:** “Assault rifles have never been an issue in law enforcement. I have been on this job for 25 years and I haven’t seen a drug dealer carry one. They are not used in crimes, they are not used against police officers.”**23**

**Fact:** “Since police started keeping statistics, we now know that ‘assault weapons’ are/were used in an underwhelming 0.026 of 1% of crimes in New Jersey. This means that my officers are more likely to confront an escaped tiger from the local zoo than to confront an assault rifle in the hands of a drug-crazed killer on the streets.”**24**

**Thoughts:** “Assault weapons” are large and unwieldy. Even misclassified handguns tend to be bigger than practical for concealed carry. Criminals (who, incidentally, disregard concealed carry laws) are unlikely to carry “assault weapons” and instead carry handguns which are more easily concealed.

**Myth: Assault weapons can be easily converted to machine guns**

**Fact:** Firearms that can be “readily converted” are already prohibited by law.**25**

**Fact:** None of the firearms on the list of banned weapons can be readily converted.**26**

**Fact:** Only 0.15% of over 4,000 weapons confiscated in Los Angeles in one year were converted, and only 0.3% had any evidence of an attempt to convert.**27**

**Myth: Assault weapons are used in 16% of homicides**

**Fact:** This figure was concocted to promote an “assault weapons” bill in New York. Their classification scheme included most firearms sold in the U.S. since 1987 (centerfire rifles, shotguns holding more than six cartridges, and handguns holding more than 10 rounds). By misclassifying most firearms as “assault weapons,” they expanded the scope of a non-problem.
Myth: The 1994 (former) Federal Assault Weapons Ban was effective

Fact: Murder rates were 19.3% higher when the Federal assault weapons ban was in force.28

Fact: “...we cannot clearly credit the ban with any of the nation’s recent drop in gun violence.”29

Fact: The ban covered only 1.39% of the models of firearms on the market, so the ban’s effectiveness is automatically limited.

Fact: “The ban has failed to reduce the average number of victims per gun murder incident or multiple gunshot wound victims.”30

Fact: “The public safety benefits of the 1994 ban have not yet been demonstrated.”31

Fact: “The ban triggered speculative price increases and ramped-up production of the banned firearms … .” and thus increased the total supply over the following decade.32

Fact: The Brady Campaign claims that “After the 1994 ban, there were 18% fewer ‘assault weapons’ traced to crime in the first eight months of 1995 than were traced in the same period in 1994.” However they failed to note (and these are mentioned in the NIJ study) that:

1. “Assault weapons” traces were minimal before the ban (due to their infrequent use in crimes), so an 18% change enters the realm of statistical irrelevancy.

2. Fewer “assault weapons” were available to criminals because collectors bought-up the available supply before the ban.

Myth: States need to ban assault weapons

Fact: State assault weapons bans “did not significantly affect murder rates” in a study covering 1980-2009.33

---

28 An examination of the effects of concealed weapons laws and assault weapons bans on state-level murder rates, Applied Economics Letters, Vol 21, No. 4

33 An examination of the effects of concealed weapons laws and assault weapons bans on state-level murder rates, Applied Economics Letters, Vol 21, No. 4
Myth: Assault weapons have only one purpose, to kill large numbers of people

Fact: Of the millions of these firearms currently in civilian hands, they are routinely used for:

- Small game hunting (especially hog hunting in thick southern brush)
- Sports competitions such as “three gun shoots”
- Self-defense, both at home and civil disorder situations like the Rodney King riots and Hurricane Katrina

Myth: Nobody needs an assault weapon

Fact: Their light weight and durability make them suitable for many types of hunting and are especially favored for wild boar hunting.

Fact: Their lighter recoil combined with light weight make them the preferred rifle with people of small stature or limited strength.

Fact: Recall the 1992 Rodney King riots in the anti-gun city of Los Angeles. Every major news network carried footage of Korean store owners sitting on the roofs of their stores, armed with “assault weapons.” Those were the stores that did not get burned to the ground, and those were the people that were not dragged into the street and beaten by rioters. “You can’t get around the image of people shooting at people to protect their stores and it working. This is damaging to the [gun control] movement.”

Fact: There are many reasons people prefer to use these firearms:

- They are easy to operate
- They are very reliable in outdoor conditions (backpacking, hunting, etc.)
- They are accurate
- They are good for recreational and competitive target shooting
- They have value in many self-defense situations

Fact: There are many sports in which these firearms are required:

- Many hunters use these firearms (especially for wild boar hunting in the south)
- Three-gun target matches
- Camp Perry competitions, especially the Service Rifle events
- DCM/CMP competitions
- Bodyguard simulations

Fact: Ours is a Bill of Rights, not a Bill of Needs.

34 Washington Post, May 2, 1992
35 Josh Sugarmann, executive director of the Violence Policy Center, Washington Post, May 18, 1993
Children and Guns

Myth: There have been 96 school shootings since Sandy Hook

Fact: This analysis of news reports was created by the gun control group Everytown for Gun Safety. This study included:

- College campuses (47% of cases)
- Suicides attempts (18%)
- Cases where nobody was hurt (27%)

Some other analysts note that many of the cases are unrelated to school activity or actually occurred near campus, not on it. All in all, it is a poor study with no relevance to child endangerment.

Myth: 13 children are killed each day by guns

Fact: Adults included – This “statistic” includes “children” up to age 19 or 24, depending on the source.\(^{36}\) Since most violent crime is committed by males ages 16-24, the “13 children” number includes adult gang members dying during criminal activity. The proper definition of “child” is a person between birth and puberty (typically 13-14 years old) and in 2013 only 1 child was killed on an average day nationwide, or about 0.02 children per state per day.

Fact: 411 children (age 14 and under) died from gunfire in all of 2012 or slightly more than one per day. This includes homicides, accidents, and suicides combined.\(^{37}\)

---

\(^{36}\) Center for Disease Control WISQARS Fatal Injury Reports for 2013
\(^{37}\) Center for Disease Control WISQARS Fatal Injury Reports for 2010
Fact: **Criminals are included** - According to the CDC, over half of all homicides of victims aged 15-19 are gang-related. The same study found that gang-related homicides are more likely to involve firearms than those that are not (95% versus 69%).

Fact: **Suicides are included** – 26% of child firearm deaths are suicides. Hence, the “13 children” statistic includes these suicides.

Fact: For contrast:

- 1,446 children die per year in transportation accidents. Parental neglect and abuse account for 80% of all child deaths (1,274) which dwarfs gun deaths. 1,917 children die each day from malaria around the world and 15 men, women, and children per day are murdered by a convicted felon in government supervised parole/probation programs in the U.S.

**Myth: More Guns in U.S. Homes, More Kids Getting Shot**

Fact: This study, published by a medical student, used a non-standard database (not official CDC records), did not analyze other variables (multi-variant analysis) and did not specify regional co-variance in gun ownership. In short, shabby science.

**Myth: Schoolyard shootings are an epidemic**

Fact: “Compared to other types of violence and crime children face, both in and outside of school, school-based attacks are rare. While the Department of Education reports 60 million children attend the nation’s 119,000

---

39 Center for Disease Control WISQARS Fatal Injury Reports for 2012

40 Center for Disease Control WISQARS Fatal Injury Reports for 2012

42 *Fact Sheet No 178*, U.N. World Health Organization, 1998

43 US Bureau of Justice Statistics, 1998
schools, available statistics indicate that few of these students will fall prey to violent situations in school settings.”

**Fact:** Over an eight year period, in states without “right to carry” laws, there were 15 school shootings; however, in states that allow citizens to carry guns, there was only one.

**Fact:** The five school shootings that occurred during the ’97-98 school year took place after the 1995 Gun-Free School Zones law was enacted, which banned guns within 1,000 feet of a school.

**Fact:** Schoolyard shooting deaths are not rising; rather, they have been falling through most of the 1990s.

**Fact:** Only 10% of public schools reported one or more serious violent crimes during the 1996-97 school year.

**Fact:** In Pearl, Mississippi, the assistant principal carried a firearm to the school until the 1995 “Gun-Free School Zones” law passed. Afterwards, he began locking his firearm in his car and parking at least a quarter-mile away from the school. In 1997, when a student began a shooting rampage, the assistant principal ran to his car, got his gun, ran back, disarmed the shooter, and held him on the ground until the police arrived. Had the law not been passed, the assistant principal might have prevented the two deaths and seven shooting-related injuries.

**Fact:** Similar prevention occurred at a school dance in Edinboro, Pennsylvania, the Appalachian School of Law and during classes in Santee, California.

---

47 *Violence and Discipline Problems in U.S. Public Schools*, National Center for Education Statistics, 1996-97

Myth: Trigger locks will keep children from accidentally shooting themselves

Fact: 31 of 32 models of gun locks tested by the government’s Consumer Product Safety Commission could be opened without the key. According to their spokesperson, “We found you could open locks with paper clips, a pair of scissors or tweezers, or you could whack them on the table and they would open.”

Fact: 85% of all communities in America recorded no juvenile homicides in 1995, and 93.4% of communities recorded one or no juvenile arrests (not convictions) for murder.

Fact: In 1996, before laws requiring trigger locks and when there were around 80 million people who owned a firearm, there were only 44 accidental gun deaths for children under age 10, or about 0.0001%.

Fact: California has a trigger lock law and saw a 12% increase in fatal firearm accidents in 1994. Texas didn’t have one and experienced a 28% decrease in the same year.

Fact: Children as young as seven (7) years old have demonstrated that they can pick or break a trigger lock; or that they can operate a gun with a trigger lock in place. Over half of non-criminal firearm deaths for children over age seven are suicides, so trigger locks are unlikely to reduce these deaths.

Fact: If criminals are deterred from attacking victims because of the fear that people might be able to defend themselves, gun locks may in turn reduce the danger to criminals committing crime, and thus increase crime. This problem is exacerbated because many mechanical locks (such as barrel or trigger locks) also require that the gun be stored unloaded.

Myth: Guns in America spark youth violence

Fact: Non-firearm juvenile violent crime rate in the U.S. is twice that of 25 other industrialized western nations. The non-firearm infant-homicide rate in the U.S. is 3.5 times higher. Thus we have a violence problem – not a “gun” problem.

49 Washington Post, Feb 7, 2001, Page A01
51 CBS News web site, Prof. John Lott, March 20, 2000
52 National Center for Health Statistics, 1995
53 Accidental Shootings: many deaths and injuries caused by firearms could be prevented, United States General Accounting Office, March 1991
Fact: Non-firearm related homicides of children out-rank firearm related homicides by children almost 5-to-1\textsuperscript{55}

Myth: More than 1,300 children commit suicide with guns

Fact: This statistic includes “children” ages 18-19.\textsuperscript{56} As established previously, a child is defined as a person between birth and the age of 13 or 14 (puberty).

Fact: Worldwide, the per capita suicide rate is fairly static (the suicide rate of the U.S. is lower than many industrial countries, including many where private gun ownership is banned). A certain fraction of the population will commit suicide regardless of the available tools.

Fact: The overall rate of suicide (firearm and non-firearm) among children age 15 and under was virtually unchanged in states that passed and maintained “safe storage” laws for four or more years.\textsuperscript{57}

Fact: Among young girls, 71% of all suicides are by hanging or suffocation.\textsuperscript{58}

Fact: People, including children, who are determined to commit suicide will find a way. There is a documented case of a man who killed himself by drilling a hole in his skull by using a power drill.\textsuperscript{59}

\textsuperscript{59}
**Fact:** Banning country music might be more effective – one study shows 51% of the music-influenced suicide differential can be traced to country music.60

**Myth: Stricter gun control laws could have prevented the Columbine massacre**

**Fact:** Harris and Klebold violated close to 20 firearms laws in obtaining weapons. Would 21 laws really have made a difference? The two shotguns and one rifle used by Harris and Klebold were purchased by a girlfriend who passed a background check, and the TEC-9 handgun used was already banned.

**Myth: Children should be kept away from guns for their own safety**

**Fact:** 0% of children that get guns from their parents commit gun-related crimes while 21% of those that get them illegally do.61

**Fact:** Children that acquire firearms illegally are twice as likely to commit street crimes (24%) than are those given a firearm by their parents (14%).62

**Fact:** Almost three times as many children (41%) consume illegal drugs if they also obtain firearms illegally, as compared to children given a firearm by their parents (13%).

**Fact:** In the 1950’s, children routinely played cops and robbers, had toy guns, were given BB rifles and small caliber hunting rifles before puberty. Yet the homicide rate in the 1950’s was almost half of that in the 1980’s.63

---

59 *Drilled Head Husband Dies in Hospital*, The Scotsman, April 28, 2003

61 *Urban Delinquency and Substance Abuse*, U.S. Justice Department, 2000

62 *Urban Delinquency and Substance Abuse*, U.S. Justice Department, 2000

Myth: More children are shot and killed in the U.S. than anywhere else

Fact: 380 children age 14 or under were killed with firearms\(^{64}\) in 2010, or 0.0005\% of the children in America and barely more than one child per day. Of those, 58\% were homicides, likely innocent bystanders in drive-by scenarios.

Myth: More children are hurt with guns than by any other means

Fact: Barely more than 1\% of all unintentional deaths for children in the U.S. between ages 0-14 are from firearms.\(^{65}\)

Fact: The Center for Disease Control, a federal agency, disagrees. According to them, in 1998, children 0-14 years died from the following causes in the U.S.\(^{66}\)

Fact: Children are 12 times more likely to die in an automobile accident than from gun-related homicides or legal interventions (being shot by a police officer, for example) if they are age 0-14. For the group 0-24 years old (which bends the definition of “child” quite a bit), the rate is still 8.6 times higher for cars.\(^{67}\)

Fact: In 2001, there were only 72 accidental firearm deaths for children under age 15, as opposed to over 2,100 children who drowned (29 times as many drowning deaths as firearm deaths).\(^{68}\)

Fact: Accidental firearm injuries for children and adolescents dropped 37\% from 1993 to 1997, with the fastest drop – a 64\% reduction – being for children.\(^{69}\)

\(^{64}\) Center for Disease Control, WISQARS Fatal Injury Reports, 2010

\(^{67}\) National Vital Statistics Report, National Center for Health Statistics, 1997
\(^{68}\) 20 Leading Causes of Unintentional Injury Deaths, Center for Disease Control, United States, 2001, (All Races, Both Sexes, Ages: 1-14)
\(^{69}\) Firearms Injury Surveillance Study, Centers for Disease Control and Prevention, December 2001
Fact: Boys who own legal firearms have much lower rates of delinquency and drug use than non-owners of guns.\textsuperscript{70}

Fact: The \textit{non-gun} homicide rate of children in the U.S. is more than twice as high as in other western countries. And eight times as many children die from \textit{non-gun} violent acts than from gun crimes.\textsuperscript{71} This indicates that the problem is violence, not guns.

Fact: Fatal gun accidents for children ages 0-14 declined by almost 83\% from 1981 to 2002\textsuperscript{72} – all while the number of handguns per capita increased over 41\%.\textsuperscript{73}

Fact: 82\% of homicides of children age 13 and under were committed \textit{without} a gun.\textsuperscript{74}

**Myth: If it saves the life of one child, it is worth it**

Fact: Firearms in private hands are used an estimated 2.5 million times (or 6,849 times each day) each year to prevent crime;\textsuperscript{75} this includes rapes, aggravated assaults, and kidnapping. The number of innocent children protected by firearm owners far outweighs the number of children harmed.

Fact: Most Americans (firearm owners or not) believe that the way parents raise kids is what causes gun violence (or just violence in general). Among \textit{non-firearm} owners, 38\% said it was parental neglect that causes youth violence, while only 28\% thought it was due to the availability of guns.\textsuperscript{76} They may be right given that most homicides of children under age five are by their own parents. Of homicides among children ages 5 and younger, 31\% were killed by their own mothers and another 31\% were killed by their own fathers.\textsuperscript{77}

\textsuperscript{74} FBI Uniform Crime Statistics, 1997

\textsuperscript{75} Gary Kleck, Criminologist, Florida State University, 1997

\textsuperscript{76} Gallup/Women.com poll, May 2000

\textsuperscript{77} FBI, \textit{Supplementary Homicide Reports}, 1976-98
Myth: The availability of guns causes crime

Fact: Though the number of firearms owned by private citizens has been increasing steadily since 1970, the overall rate of homicides and suicides has not risen. As the chart shows, there is no correlation between the availability of firearms and the rates of homicide and suicide in America.

Fact: Internationally speaking “There’s no clear relationship between more guns and higher levels of violence.”

Fact: “A detailed study of the major surveys completed in the past 20 years or more provides no evidence of any relationship between the total number of legally held firearms in society and the rate of armed crime. Nor is there a relationship between the severity of controls imposed in various countries or the mass of bureaucracy involved with many control systems with the apparent ease of access to firearms by criminals and terrorists.”

Fact: Handgun ownership among groups normally associated with higher violent crime (young males, blacks, low income, inner city, etc.) is at or below national averages.

Fact: Among inmates who used a firearm in the commission of a crime, the most significant correlations occurred when the inmates’ parents abused drugs (27.5%) and when inmates had friends engaged in illegal activities (32.5% for robberies, 24.3% for drug trafficking).

Fact: Five out of six gun-possessing felons obtained handguns from the secondary market and by theft, and “[the] criminal handgun market is overwhelmingly dominated by informal transactions and theft as mechanisms of supply.”

80 Minutes of Evidence, Colin Greenwood, Select Committee on Northern Ireland Affairs, January 29, 2003
81 Targeting Guns: Firearms and Their Control, Gary Kleck, Aldine de Gruyter, 1997. (Ownership tables derived from the annual “General Social Survey.”)
82 Firearm Use by Offenders, Bureau of Justice Statistics, November 2001
Fact: The majority of handguns in the possession of criminals are stolen, and not necessarily by the criminals in question. In fact, over 100,000 firearms are stolen in burglaries every year, and most of them likely enter the criminal market (i.e., are sold or traded to criminals).

Fact: In 1968, the U.K. passed laws that reduced the number of licensed firearm owners, and thus reduced firearm availability. U.K. homicide rates have steadily risen since then. Ironically, firearm use in crimes has doubled in the decade after the U.K. banned handguns.

Fact: Most violent crime is caused by a small minority of repeat offenders. One California study found that 3.8% of a group of males born in 1956 were responsible for 55.5% of all serious felonies. 75-80% of murder arrestees have prior arrests for a violent (including non-fatal) felony or burglary. On average, they have about four felony arrests and one felony conviction.

Fact: Half of all murders are committed by people on “conditional release” (i.e., parole or probation). 81% of all homicide defendants had an arrest record, 67% had a felony arrest record, 70% had a conviction record, and 54% had a felony conviction.

Fact: Per capita firearm ownership rates have risen steadily since 1959 while crime rates have gone up and down depending on economics, drug trafficking innovations, and “get tough” legislation.

90 Felony Defendants in Large Urban Counties, 1998, Brian Reaves, U.S. Department of Justice, Office of Justice Programs, Bureau of Justice Statistics, November 2001
Thoughts: Criminals are not motivated by guns. They are motivated by opportunity. Attempts to reduce public access to firearms provide criminals more points of opportunity. It is little wonder that high-crime cities also tend to be those with the most restrictive gun control laws – which criminals tend to ignore.

Myth: Gun availability increases suicide rates

Fact: Cross national studies show that there is no relationship to suicides rates and the availability of firearms. Two outstanding contrasts:

- The U.S. and Canada – who share geography, cultural elements, and entertainment – have nearly identical suicide rates, but Canada has significantly lower gun ownership.
- Lithuania – which has nearly zero gun ownership – has the world’s highest suicide rate, more than three times that of the United States.

Myth: Gun availability is what is causing school shootings

Fact: Schoolyard shootings have been occurring since at least 1974, so it is not a new phenomenon due to increases in gun ownership.\(^{92}\)

Fact: More than 50% of these murderers started thinking about their assaults two or more weeks before the shooting, and 75% plan out their attacks, showing these event are not spontaneous.\(^ {93}\)

Thoughts: In rural areas, guns are everywhere and children are taught to shoot at young ages – yet these areas are almost devoid of schoolyard shootings. Clearly, availability is not the issue.

\(^{91}\) Felony Defendants in Large Urban Counties, 1998, Brian Reaves, U.S. Department of Justice, Office of Justice Programs, Bureau of Justice Statistics, November 2001 (Based on a compilation of 85 separate surveys from 1959 through 1996.)

Myth: Gun availability leads to massacres

Fact: In 62% of mass public shootings, the assailant had a history of having “displayed signs of mental health problems prior to the killings.”

Myth: Gun ownership is linked to higher homicide rates

Fact: This “study” has multiple defects which, when corrected, reverse the results. Some of the defects of this study include:

- Exclusion of the District of Columbia, a high crime city
- Use of other crime rates to indirectly explain homicide rates
- Use of purely cross-sectional data that never allowed control variable analysis
- Data from different years is used without any explanation (unemployment rate from 2000 to explain the homicide rate from 2001 to 2003, etc.).

Myth: Handguns are 43 times more likely to kill a family member than a criminal

Fact: Of the 43 deaths reported in this flawed study, 37 (86%) were suicides. Other deaths involved criminal activity between the family members (e.g. botched drug deals).

Fact: Of the remaining deaths, the deceased family members include felons, drug dealers, violent spouses committing assault, and other criminals.

Fact: Only 0.1% of the defensive uses of guns results in the death of the predator. This means you are much more likely to prevent a crime without bloodshed than hurt a family member.

94 Mass Shootings: Maybe What We Need Is a Better Mental-Health Policy, Mother Jones, November 9, 2012

96 Protection or Peril? An Analysis of Firearm-Related Deaths in the Home, Arthur L. Kellerman, D.T. Reay, 314 New Eng. J. Med. 1557-60, June 12, 1986. (Kellerman admits that his study did “not include cases in which burglars or intruders are wounded or frightened away by the use or display of a firearm.” He also admitted his study did not look at situations in which intruders “purposely avoided a home known to be armed.” This is a classic case of a “study” conducted to achieve a desired result. In his critique of this “study,” Gary Kleck notes that the estimation of gun ownership rates was “inaccurate,” and that the total population came from a non-random selection of only two cities.)

98 Point Blank: Guns and Violence in America, Gary Kleck, New York: Aldine de Gruyter, 1991
Crime And Guns

Basic to the debates on gun control is the fact that most violent crime is committed by repeat offenders. Dealing with recidivism is key to solving violence.

- 71% of gunshot victims had previous arrest records.
- 64% had been convicted of a crime.
- Each had an average of 11 prior arrests.\(^9\)\(^9\),\(^\text{100}\)
- 63% of victims had criminal histories and 73% of that group knew their assailant (twice as often as victims without criminal histories).\(^\text{101}\)
- 74% of homicides during the commission of a felony involve guns.\(^\text{102}\)

Most gun violence is between criminals. This should be the public policy focus.

Myth: Guns are not a good deterrent to crime

Fact: Guns prevent an estimated 2.5 million crimes a year or 6,849 every day.\(^\text{103}\) Most often, the gun is never fired and no blood (including the criminal’s) is shed.

Fact: Property crime rates are dropping (especially burglaries). The chart shows the legal handgun supply in America (mainly in civilian hands) to the property crime rate.\(^\text{104}\)

Fact: Every day 400,000 life-threatening violent crimes are prevented using firearms.

Fact: 60% of convicted felons admitted that they avoided committing crimes when they knew the victim was armed. 40% of convicted felons admitted that they avoided committing crimes when

\(^\text{104}\) National Crime Victimization Survey, 2000, Bureau of Justice Statistics, BATF estimates on handgun supply
they thought the victim might be armed.105

Fact: Felons report that they avoid entering houses where people are at home because they fear being shot.106

Fact: 59% of the burglaries in Britain, which has tough gun control laws, are “hot burglaries” which are burglaries committed while the home is occupied by the owner/renter. By contrast, the U.S., with more lenient gun control laws, has a “hot burglary” rate of only 13%.108

Fact: Washington DC has essentially banned gun ownership since 1976 and has a murder rate of 56.9 per 100,000. Across the river in Arlington, Virginia, gun ownership is less restricted. There, the murder rate is just 1.6 per 100,000, less than three percent of the Washington, DC rate.110

Fact: 26% of all retail businesses report keeping a gun on the premises for crime control.111

Fact: In 1982, Kennesaw, GA passed a law requiring heads of households to keep at least one firearm in the house. The residential burglary rate dropped 89% the following year.112

Fact: A survey of felons revealed the following:113

- 74% of felons agreed that, “one reason burglars avoid houses when people are at home is that they fear being shot during the crime.”
- 57% of felons polled agreed, “criminals are more worried about meeting an armed victim than they are about running into the police.”

105 Armed and Considered Dangerous: A Survey of Felons and Their Firearms, James Wright and Peter Rossi, Aldine, 1986
106 Armed and Considered Dangerous: A Survey of Felons and Their Firearms, James Wright and Peter Rossi, Aldine, 1986
107 A “hot burglary” is when the burglar enters a home while the residents are there
108 Dr. Gary Kleck, Criminologist, Florida State University (1997) and Kopel (1992 and 1999)
109 The Supreme Court invalidated the D.C. handgun ban in the Heller case (2008), but the city has made obtaining a handgun very difficult via local legislation
110 Crime in the United States, FBI, 1998

112 Crime Control Through the Private Use of Armed Force, Dr. Gary Kleck, Social Problems, February 1988
Myth: Private guns are used to commit violent crimes

Fact: 90% of all violent crimes in the U.S. do not involve firearms of any type.\textsuperscript{114}

Fact: Even in crimes where the offender possessed a gun during the commission of the crime, 83% did not use or threaten to use the gun.\textsuperscript{115}

Fact: Fewer than 1% of firearms will ever be used in the commission of a crime.\textsuperscript{116}

Fact: Two-thirds of the people who die each year from gunfire are criminals being shot by other criminals.\textsuperscript{117}

Fact: 92% of gang murders are committed with guns.\textsuperscript{118} Gangs are responsible for between 48% and 90% of all violent crimes.\textsuperscript{119}

Fact: Most gun crimes are gang related, and as such are big-city issues. In fact, if mayors in larger cities were more diligent about controlling gang warfare, state and nationwide gun violence rates would fall dramatically.

Myth: 40% of Americans have been or personally know a gun violence victim

Fact: This data was from an unpublished survey conducted by a political research organization. Their own footnote reads “Greenberg Quinlan Rosner Research for the New Venture Fund (Aug. 2011). Note, this is not publicly available data.”\textsuperscript{120}

\textsuperscript{114} Bureau of Alcohol, Tobacco and Firearms, 1998
\textsuperscript{115} National Crime Victimization Survey, 1994, Bureau of Justice Statistics
\textsuperscript{116} FBI Uniform Crime Statistics, 1994
\textsuperscript{117} FBI Uniform Crime Statistics, 1994
\textsuperscript{118} Homicide trends in the United States, Bureau of Justice Statistics, November 2011
\textsuperscript{119} 2011 National Gang Threat Assessment, FBI, September 2011
\textsuperscript{120} Preventing Gun Violence Through Effective Messaging, OMP, KNP Communications, 2012
Myth: Interstate transportation of guns defeats local gun control

Fact: The BATF reports that the average age of a traced gun is 11 years\textsuperscript{121}, meaning that most guns moving from state-to-state were transported when legal owners moved.

Fact: Fewer than 5% of traced guns in California, many of which were not crime guns, came from neighboring Nevada and Arizona.\textsuperscript{122}

Myth: High capacity, semi-automatics are preferred by criminals

Fact: The use of semi-automatic handguns in crimes is slightly lower than the ratio of semi-automatic handguns owned by private citizens. Any increase in style and capacity simply reflects the overall supply of the various types of firearms.\textsuperscript{123}

Myth: Banning “Saturday Night Specials” reduces crime

Fact: This was the conclusion of the Johns Hopkins University Center for Gun Policy and Research – and it is wrong. They studied firearm homicide rates from Maryland after passage of a “Saturday Night Special” ban in 1998. It seems the firearm homicide rate has not subsided and remained between 68-94% higher than the national average through 2008.\textsuperscript{124}

Fact: Even banning guns does not slow down criminals. In the U.K., where private ownership of firearms is practically forbidden, criminals have and use guns regularly, and even build their own. One enterprising fellow converted 170 starter pistols to functioning firearms and sold them to gangs. Hundreds of such underground gun factories have been established, contributing to a 35% jump in gun violence.\textsuperscript{125}

Myth: Criminals prefer “Saturday Night Specials”\textsuperscript{126}

Fact: “Saturday Night Specials” were used in fewer than 3% of crimes involving guns.\textsuperscript{127}

\textsuperscript{121} BATF report #133664, California Tracing Reports for 2012
\textsuperscript{122} BATF report #133664, California Tracing Reports for 2012
\textsuperscript{123} Targeting Guns, Dr. Gary Kleck, Criminologist, Florida State University, Aldine, 1997
\textsuperscript{124} Injury Mortality Reports 1999-2008, Center for Disease Control, online database
\textsuperscript{125} Gun crime spreads ‘like a cancer’ across Britain, The Guardian, Oct 5, 2003
\textsuperscript{126} “Saturday Night Special” is a term, with racist origin, describing an inexpensive firearm. Part of the origin of the term came from “suicide special”, describing an inexpensive handgun purchased specifically for committing suicide. The racist origins are too detestable to repeat here.
\textsuperscript{127} FBI Uniform Crime Statistics, 1994
Fact: Fewer than 2% of all “Saturday Night Specials” made are used in crimes.

Fact: “What was available was the overriding factor in weapon choice [by criminals].”

Myth: Gun shows are supermarkets for criminals

Fact: Only 0.7% of convicts bought their firearms at gun shows. 39.2% obtained them from illegal street dealers.

Fact: Less than 1% of “crime guns” were obtained at gun shows. This is a reduction from a 1997 study that found 2% of guns used in criminal offenses were purchased at gun shows.

Fact: The FBI concluded in one study that no firearms acquired at gun shows were used to kill police. “In contrast to media myth, none of the firearms in the study were obtained from gun shows.”

Fact: Only 5% of metropolitan police departments believe gun shows are a problem.

Fact: Only 3.5% of youthful offenders reported that they obtained their last handgun at a gun show.

Fact: 93% of guns used in crimes are obtained illegally (i.e., not at gun stores or gun shows).

Fact: At most, 14% of all firearms traced in investigations were purchased at gun shows. But this includes all firearms that the police traced, whether or not they were used in crimes, which overstates the acquisition rate.

Fact: Gun dealers are federally licensed. They are bound to stringent rules for sales that apply equally whether they are selling firearms from a storefront or a gun show.

135 BATF, 1999
136 BATF, June 2000, covers only July 1996 through December 1998
137 BATF, 2000
Fact: Most crime guns are either bought off the street from illegal sources (39.2%) or through straw-man purchases by family members or friends (39.6%).138

Myth: All four guns used at Columbine were bought at gun shows

Fact: Each of the guns was either bought through an intermediary or someone who knew they were going to under aged buyers. In all cases there was a purposeful criminal activity occurring and the actors knew they were breaking the law.

Myth: 25-50% of the vendors at most gun shows are “unlicensed dealers”

Fact: There is no such thing as an “unlicensed dealer,” except for people who buy and sell antique – curio – firearms as a hobby (not a business).

Fact: This 25-50% figure can only be achieved if you include those dealers not selling guns at these shows. These non-gun dealers include knife makers, ammunition dealers, accessories dealers, military artifact traders, clothing vendors, bumper sticker sellers, and hobbyists. In short, 50% of the vendors at shows are not selling firearms at all!

Myth: Regulation of gun shows would reduce “straw sales”

Fact: The main study that makes this claim had no scientific means for determining what sales at the show were “straw sales.” Behaviors that Dr. Wintemute cited as “clear evidence” of a straw purchase were observational only and were more likely instances of more experienced acquaintances helping in a purchase decision. No attempts were made to verify that the sales in question were straw sales.139

Myth: Prison isn't the answer to crime control

Fact: From 1960-1980, per capita imprisonment for violent crimes fell from 738 to 227. In the same period, violent crime rates nationwide tripled.

Fact: Why does crime rise when criminals are released from prison early? Because they are likely to commit more crimes. 67.5% were re-arrested for new felonies or serious misdemeanors within three years. Extrapolating, those released felons killed another 2,282 people.140

138 Firearm use by Offenders, Bureau of Justice Statistics, November 2001
139 Gun shows across a multistate American gun market, Dr. GJ Wintemute, British Medical Journal, 2007
140 Reentry Trends in the U.S., Recidivism, Department of Justice, 1999
Fact: 45% of state prisoners were, at the time they committed their offense, under conditional supervision in the community – either on probation or on parole.¹⁴¹ Keeping violent convicts in prison would reduce violent crimes.

Fact: Homicide convicts serve a little more than half of their original sentences.¹⁴² Given that men tend to be less prone to violent behavior as they age,¹⁴³ holding them for their full sentences would probably reduce violence significantly.

Fact: Los Angeles County saw repeat offender and re-arrest rates soar after authorities closed jails and released prisoners early. In less than three years, early release of prisoners in LA resulted in:¹⁴⁴

- 15,775 rearrested convicts
- 1,443 assault charges¹⁴⁵
- 518 robbery charges
- 215 sex offense charges
- 16 murder charges

Fact: In 1991, 13,200 homicides were committed by felons on parole or probation. For comparison sake, this is about half of the 1999 annual gun death totals (keep in mind that gun deaths fell from 1991 to 1999).

Myth: Waiting periods prevent rash crimes and reduce violent crime rates

Fact: The average “time-to-crime” of a firearm is about 11 years, making it rare that a newly purchased firearm is used in a crime.¹⁴⁶

Fact: The national five-day waiting period under the Brady Bill had no impact on murder or robbery. In fact, there was a slight increase in rape and aggravated assault, indicating no effective suppression of certain violent crimes. Thus, for two crime categories, a possible effect was to delay law-abiding citizens from getting a gun for protection. The risks were greatest for crimes against women.¹⁴⁷

¹⁴¹ US Bureau of Justice Statistics, 1991
¹⁴² Firearm Use by Offenders, Bureau of Justice Statistics, November 2001
¹⁴³ Homicide rates peak in the 18-24 year old group, Bureau of Justice Statistics, online database
¹⁴⁴ Releasing Inmates Early Has a Costly Human Toll, Los Angeles Times, May 14, 2006
¹⁴⁵ Keep in mind these are just charges. Each arrested convict may have committed multiple crimes.
¹⁴⁶ Bureau of Alcohol, Tobacco and Firearms as reported by Time Magazine, July 12, 2002
¹⁴⁷ Dr. John Lott Jr., University of Chicago School of Law, 1997
Fact: Comparing homicide rates in 18 states that had waiting periods and background checks before the Brady Bill with rates in the 32 states that had no comparable laws, the difference in change of homicide rates was “insignificant”. 148

Myth: 86% of Americans, 82% of gun owners favor universal background checks

Fact: Those statistics came from a pair of surveys reported by gun control group Mayors Against Illegal Guns, who has been caught stacking survey responses by polling left-of-center mailing lists.

Myth: Gun makers are selling plastic guns that slip through metal detectors

Fact: There is no such thing as a ‘plastic gun.’ This myth started in 1980149 when Glock began marketing a handgun with a polymer frame, not the entire firearm. Most of a Glock is metal (83% by weight) and detectable in common metal and x-ray detectors. “[D]espite a relatively common impression to the contrary, there is no current non-metal firearm not reasonably detectable by present technology and methods in use at our airports today, nor to my knowledge, is anyone on the threshold of developing such a firearm.”150 Incidentally, Glocks are one of the favorite handguns of police departments because it is lightweight, thanks to the polymer frame.

Myth: Machine guns151 are favored by criminals

Fact: In the drug-ridden Miami of 1980, less than 1% of all gun homicides were committed with machine guns.152

Fact: None of over 2,220 firearms recovered from crime scenes by the Minneapolis police in 1987-89 were machine guns.153

Fact: 0.7% of seized guns in Detroit in 1991-92 were machine guns.154

---

148 Dr. Jens Ludwig, Dr. Philip J. Cook, Journal of the American Medical Association, August 2000
149 Heckler and Koch made a polymer framed firearm earlier, in 1968, but the myth seems to have erupted after Glock began promoting theirs to police departments.
151 In this myth, “machine gun” represents “fully automatic” firearms, ones that fire bullets as long as the trigger is pulled
152 Miami Herald, August 23, 1984, based on figures from Dr. Joseph Davis, Dade County medical examiner
153 1994, Minnesota Medical Association Firearm Injury Prevention Task Force
154 J. Gayle Mericle, 1989, Unpublished report of the Metropolitan Area Narcotics Squad, Will and Grundy Counties
Myth: Corrupt dealers sell almost 60 percent of crime guns

**Fact:** Only 0.5% of the reported traces were for original purchase three years of less before the trace was conducted.155 Thus, 99.5% of retailer sales had left their control long before the gun was traced (and many traces are not for crime guns).

**Fact:** The average “time to crime,” the time between the retail sale of a firearm and its use in a crime, is six years. A firearm can change hands several times and travel far in six years.

155 *Following the Gun: Enforcing Federal Law Against Firearms Traffickers*, BATF, 2000
Mass Shootings

There are two criminology definitions for public shootings, and they are very different:

**Active Shooter Events (ASE):** Where a person shoots at multiple people in public, though there may be no deaths.156

**Mass Public Shootings (MPS):** Public shooting events where four or more people are killed.157

**Myth: Mass public shootings are increasing**

**Fact:** Over a 35 year period, the number of mass public shootings rose during the violence escalation decades of the 1970s and 1980, then leveled off, despite a growing population and greater availability for firearms (more people, more guns).

**Special Note:** The FBI created a study of what they labeled “active shooter” events from 2000-2013, but they merged both ASEs and MPSs. Combined, this data shows an increase whereas other studies that separate the two do not. But it must be noted that their study starts in the year 2000, which had an abnormally low number of public shootings (only one).158

---

156 “One or more persons engaged in killing or attempting to kill multiple people in an area (or areas) occupied by multiple unrelated individuals. At least one of the victims must be unrelated to the shooter. The primary motive appears to be mass murder; that is the shooting is not a by-product of an attempt to commit another crime.” *United States Active Shooter Events from 2000 to 2010*, School of Criminal Justice, Texas State University, 2014 – published by the Federal Bureau of Investigation

157 “Slaughter of four or more victims by one or a few assailants within a single event, lasting but a few minutes or as long as several hours”, *Multiple Homicide: Patterns of Serial and Mass Murder*, James Alan Fox, Jack Levin, Crime and Justice, Vol. 23, 1998

158 *A Study of Active Shooter Incidents in the United States Between 2000 and 2013*, FBI, September 2013
Myth: More people are dying in mass public shootings

**Fact:** Though the raw number of mass public shootings has risen slightly over three decades, the number of people killed has *fallen* as a function of the population.

**Fact:** Mass public shooting deaths make up less than 1% of all gun homicides, making them a small part of the problem.

Myth: America has the highest rate of mass shootings in developed countries

**Fact:** On a per population basis, the United States ranks fourth behind three European countries.

Myth: Easy access to guns creates an incentive for mass public shootings

**Fact:** At least 61% of mass public shooters showed signs of mental instability in the days, weeks or months before their massacres. The rate might be higher because privacy laws prevent fully exploring the mental health history of some killers. Mental health is the determinant variable.

---

159 *Mass Shootings: Media, Myths, and Realities*, Jaclyn Schildkraut, H. Jaymi Elsass

160 *Mass Shootings: Maybe What We Need Is a Better Mental-Health Policy*, Mother Jones, Nov 2012, analysis of 62 mass public shootings
Understanding conflicting reports on "mass public shootings"

There are several different studies concerning mass public shootings, which make different claims. The primary points of confusion come from:

1. How the counting of such shootings are done
2. How they define “mass public shooting”

Here are some of the studies that are circulated and various critiques of them.

**Mother Jones**\(^{161}\)

- Study used media reports of mass shootings, which may not cover all such shootings and which lack criminological objectivity.
- There appear to be some arbitrary omissions of events that do not fit their definition of a public shooting.
- They only count “lone gunman” events, and never the more common inner-city, gang-related multi-shooter episodes.
- They include terrorist activities, such as the Fort Hood massacre.

Mother Jones concludes that mass shootings occur more frequently than several decades ago, and that the mass public shooting rate tripled since 2011.

**James Alan Fox, Northeastern University criminologist**\(^{162}\)

- Based on police reports, which are uniform and comprehensive.
- Includes all mass shootings, including those not in public, which defies the idea of a mass public shooting.

Concludes that mass shooting have remained relatively stable over time.

**Grant Duwe, Minnesota Department of Corrections, criminologist**\(^{163}\)

- Uses FBI Supplementary Homicide Reports for the core list, then media reports to provide details.
- Includes only public events.
- Excludes events related to other crimes (such as robberies gone wrong).

---

\(^{161}\) *A Guide to Mass Shootings in America*, Mother Jones, May 2014
\(^{162}\) *Mass Shootings in America: Moving Beyond Newtown*, Homicide Studies, 2013
Concludes that mass public shootings declined from 1999 to 2011, then spiked in 2012 (the year of the Sandy Hook Elementary School shooting), then returned to the mean of previous years.

*The one thing all of the studies agree upon is that mass public shootings are statistically rare*
Police And Guns

Myth: Police favor gun control

**Fact:** 94% of law enforcement officials believe that citizens should be able to purchase firearms for self-defense and sporting purposes.\(^{164}\)

**Fact:** In a survey of 15,000 law enforcement professionals:\(^{165}\)
- 96% opposed limiting magazine capacity
- 91% think banning “assault weapons” would have no effect or a negative effect
- 62% said they would not enforce new gun control laws

**Fact:** 65.8% believe there should be no gun rationing, such as ‘one gun per month’ schemes.

**Fact:** 97.9% of police officers believe criminals are able to obtain any type of firearm through illegal means.

**Fact:** “Gun control has not worked in D.C. The only people who have guns are criminals. We have the strictest gun laws in the nation and one of the highest murder rates. It’s quicker to pull your Smith & Wesson than to dial 911 if you’re being robbed.”\(^{166}\)

Myth: Police are our protection – people don’t need guns

**Fact:** Tell that to 14,196 murder victims, 345,031 robbery victims, and 79,770 rape victims who the police could not help.\(^{167}\)

**Fact:** The courts have consistently ruled that the police do not have an obligation to protect individuals. In Warren v. District of Columbia Metropolitan Police Department, 444 A.2d 1 (D.C. App. 1981), the court stated “… courts have without exception concluded that when a municipality or other governmental entity undertakes to furnish police services, it assumes a duty only to the public at large and not to individual members of the community.”

**Fact:** There are not enough police to protect everyone. In 1999, there were about 150,000 police officers on duty at any one time.\(^{168}\)

---

\(^{164}\) *17th Annual National Survey of Police Chiefs & Sheriffs*, National Association of Chiefs of Police, 2005

\(^{165}\) *Gun Policy & Law Enforcement survey*, PoliceOne, March 2013

\(^{166}\) Lt. Lowell Duckett, Special Assistant to DC Police Chief; President, Black Police Caucus, The Washington Post, March 22, 1996

\(^{167}\) FBI Uniform Crime Statistics, 2014

\(^{168}\) US Justice Department, 1998
• This is on-duty police. This includes desk clerks, command sergeants, etc. – far fewer than 150,000 cops are cruising our neighborhoods.
• There were approximately 271,933,702 people living in the United States in 1999.\textsuperscript{169}
• Thus \textit{there is only one on-duty cop for every 1,813 citizens!}

\textbf{Fact:} Former Florida Attorney General Jim Smith told Florida legislators that police responded to only 200,000 of 700,000 calls for help to Dade County authorities.

\textbf{Fact:} The United States Department of Justice found that, in 1989, there were 168,881 crimes of violence for which police had not responded within 1 hour.

\textbf{Fact:} 95\% of the time police arrive, too late to prevent a crime or arrest the suspect.\textsuperscript{170}

\textbf{Fact:} 75\% of protective/restraining orders are violated and police often won’t enforce them unless they witness the violation.\textsuperscript{171}

\textbf{Fact:} Despite prompt law enforcement responses, most armed and violent attacks at schools were stopped by means other than law enforcement intervention.\textsuperscript{172} Often these interventions were by administrators, teachers, or other students who were licensed to carry firearms.

\textbf{Myth: The supply of guns is a danger to law enforcement}

\textbf{Fact:} The courts kill cops by letting felons out of prison early. Of police killed in the line of duty:

• 70\% are killed by criminals with prior arrest records
• 53\% of these criminals have prior convictions
• 22\% are on probation when the officer is killed

\textbf{Myth: “Cop Killer” bullets need to be banned}

\textbf{Fact:} KTW rounds, wrongly labeled as “cop killer” bullets, were designed by police officers\textsuperscript{173} for use by police to penetrate hard targets like car windshields. KTWs have never been sold to the general public.\textsuperscript{174}

\textsuperscript{169} US Census Bureau, 1999 estimate
\textsuperscript{170} \textit{This is 911 ... please hold,} Witkin, Gordon, Guttmann, Monika and Lenzy, Tracy. U.S. News & World Report, June 17, 1998
\textsuperscript{171} \textit{Anti-stalking laws usually are unable to protect targets,} Ellen Sorokin, Washington Times, April 16, 2000
\textsuperscript{172} \textit{Threat Assessment In Schools,} U.S. Secret Service and U.S. Department of Education, 2002
\textsuperscript{173} Developed by Daniel Turcos (a police sergeant) and Donald Ward (Dr. Kopsch's special investigator)
\textsuperscript{174} \textit{Cop Killer Bullets,} Mike Casey, July 2000
Myth: Teflon bullets are designed to penetrate police bullet-proof vests

Fact: KTW rounds are Teflon coated to prevent heat build-up in a police officer’s gun barrel, not to pierce body armor.\textsuperscript{175}

\textsuperscript{175} Cop Killer Bullets, Mike Casey, July 2000
Myth: Private ownership of guns is not effective in preventing crime

Fact: Every year, people in the United States use guns to defend themselves against criminals an estimated 2,500,000 times – more than 6,500 people a day, or once every 13 seconds. Of these instances, 15.7% of the people using firearms defensively stated that they “almost certainly” saved their lives by doing so.

Fact: Even the government’s estimate, which has a major methodology problem, estimates people defend themselves 235,700 times each year with guns.

Fact: The number of times per year an American uses a firearm to deter a home invasion alone is 498,000.

Fact: In 83.5% (2,087,500) of these successful gun defenses, the attacker either threatened or used force first, proving that guns are very well suited for self-defense.

Fact: The rate of defensive gun use (DGU) is six times that of criminal gun use.

Fact: Of the 2,500,000 times citizens use guns to defend themselves, 92% merely brandish their gun or fire a warning shot to scare off their attackers.

---

176 Journal of Criminal Law and Criminology, Kleck and Gertz, Fall 1995
177 This ongoing victimization survey involved people from the government personally interviewing victims in person. Some criminologists believe this induces self-reporting biases (e.g., people don't like to tell the government they own a gun). Thus this low number from the National Crime Victimization Survey is considered to be an outlier and not reliable.
180 Crime statistics: Bureau of Justice Statistics - National Crime Victimization Survey (2005). DGU statistics: Targeting Guns, Kleck (average of 15 major surveys where DGUs were reported)
**Fact:** In most of the remaining 8% of defensive gun uses does a citizen wound his or her attacker (they fire warning shots), and in less than one instance per thousand is the attacker killed.\(^ {181} \)

**Fact:** In one local review of firearm homicide, more than 12% were civilian legal defensive homicides.\(^ {182} \)

**Fact:** For every accidental death (802), suicide (16,869) or homicide (11,348)\(^ {183} \) with a firearm (29,019), 13 lives (390,000)\(^ {184} \) are preserved through defensive use.

**Fact:** When using guns in self-defense, 91.1% of the time, not a single shot is fired.\(^ {185} \)

**Fact:** After the implementation of Canada’s 1977 gun controls prohibiting handgun possession for protection, the “breaking and entering” crime rate rose 25%, surpassing the American rate.\(^ {186} \)

**Myth:** You are more likely to be injured or killed using a gun for self-defense

**Fact:** You are far more likely to survive violent assault if you defend yourself with a gun.\(^ {187} \)

**Myth:** Only police should have guns

**Fact:** “Most criminals are more worried about meeting an armed victim than they are about running into the police.”\(^ {188} \)

---

\(^ {181} \) *Targeting Guns*, Gary Kleck, Aldine de Gruyter, 1997, from the National Self-Defense Survey

\(^ {188} \) *Armed and Considered Dangerous: A Survey of Felons and Their Firearms*, Wright and Rossi, 1986
Fact: For kids in schools, police end such attacks only 27% of the time.189

Fact: 11% of police shootings kill an innocent person – about 2% of shootings by citizens kill an innocent person.190

Fact: Police have trouble keeping their own guns. Hundreds of firearms are missing from the FBI and 449 of them have been involved in crimes.191

Fact: People who saw the helplessness of the L.A. Police Department during the 1992 King Riots or the looting and violence in New Orleans after hurricane Katrina know that citizens need guns to defend themselves.

Fact: “In actual shootings, citizens do far better than law enforcement on hit potential. They hit their targets and they don’t hit other people. I wish I could say the same for cops. We train more, they do better.”192

**Myth: Guns are not effective in preventing crime against women**

Fact: Of the 2,500,000 annual self-defense cases using guns, more than 7.7% (192,500) are by women defending themselves against sexual abuse.

Fact: When a woman was armed with a gun or knife, only 3% of rape attacks were completed, compared to 32% when the woman was unarmed.193

Fact: The probability of serious injury from an attack is 2.5 times greater for women offering no resistance than for women resisting with guns. Men also benefit from using guns, but the benefits are smaller: Men are 1.4 times more likely to receive a serious injury.194

Fact: 28.5% of women have one or more guns in the house.195

189 Implications for the Prevention of School Attacks, United States Secret Service and United States Department of Education, 2002
191 ABC News, July 17, 2001
192 Sheriff Greg White, Cole County, Missouri, Guns to be allowed on campus?, KRCG News, July 31, 2009
193 Law Enforcement Assistance Administration, Rape Victimization in 26 American Cities, U.S. Department of Justice, 1979
194 National Crime Victimization Survey, Department of Justice
Fact: 41.7% of women either own or have convenient access to guns.  

Fact: In 1966, the city of Orlando responded to a wave of sexual assaults by offering firearms training classes to women. Rapes dropped by nearly 90% the following year.

Fact: Firearm availability appears to be particularly useful in avoiding rape. The United Kingdom virtually banned handgun ownership. During the same period handgun ownership in the United States steadily rose. Yet the rate of rape decreased in the United States and skyrocketed in the other countries, as shown in the table.

Fact: More Americans believe having a gun in the home makes them safer. This belief grows every year the survey is taken.

Fact: Arthur Kellerman, a researcher whose work is often cited by gun control groups, said “If you’ve got to resist, your chances of being hurt are less the more lethal your weapon. If that were my wife, would I want her to have a .38 Special in her hand? Yeah.”

197 Americans by Slight Margin Say Gun in the Home Makes It Safer, Gallup Poll, October 20, 2006
198 Gun Crazy, S.F. Examiner, April 3, 1994
Concealed Carry

Myth: Concealed carry doesn't prevent crimes

Fact: News reports tell many stories of armed civilians preventing mass murder in public. A few selected at random include:

- A citizen with a gun stopped a knife-wielding man as he began stabbing people in a Salt Lake City store.
- Two men retrieved firearms from their cars and stopped a mass murder at the Appalachian School of Law.
- Citizen takes out shooter while police were pinned down in Early, Texas.
- Citizen stops apartment shoot-up in Oklahoma City.
Myth: Concealed carry laws increase crime

Fact: Forty three states, comprising the majority of the American population, are "right-to-carry" states – thirty six are "shall issue" states where anyone without a criminal record will be issued a permit, and seven states require no permit. In 1988, there were only 10 “right-to-carry” states. Statistics show that in these states the crime rate fell (or did not rise) after the right-to-carry law became active (as of July, 2006). Seven states are “may issue” states where a subjective permitting process exists; in many of those states, it is nearly impossible to obtain a CCW permit.

Fact: Gun homicides were 10% higher in states with restrictive CCW laws, according to a study spanning 1980-2009\(^\text{199}\)

Fact: Crime rates involving gun owners with carry licenses have consistently been about 0.02% of all carry license holders since Florida’s right-to-carry law started in 1988.\(^\text{200}\)

Fact: After passing their concealed carry law, Florida’s homicide rate fell from 36% above the national average to 4% below.\(^\text{201}\)

Fact: In Texas, murder rates fell 50% faster than the national average in the year after their concealed carry law passed. Rape rates fell 93% faster in the first year after enactment, and 500% faster in the second.\(^\text{202}\) Assaults fell 250% faster in the second year.\(^\text{203}\)

\[\begin{array}{|l|c|}
\hline
\text{Type of Crime} & \% \text{Higher in Restrictive States} \\
\hline
\text{Robbery} & 105\% \\
\text{Murder} & 86\% \\
\text{Assault} & 82\% \\
\text{Violent Crime} & 81\% \\
\text{Auto Theft} & 60\% \\
\text{Rape} & 25\% \\
\hline
\end{array}\]

\(^{199}\) An examination of the effects of concealed weapons laws and assault weapons bans on state-level murder rates, Applied Economics Letters, Vol 21, No. 4
\(^{200}\) Florida Department of Justice, 1998
\(^{202}\) Some criminologist believe measuring first year change is shortsighted as it takes more than a year for permits to be issued, reach critical quantities, and for the criminally minded to recognize the new situation and avoid violent confrontations.
Fact: More to the point, crime is significantly higher in states without right-to-carry laws.204

Fact: States that disallow concealed carry have violent crime rates 11% higher than national averages.205

Fact: Deaths and injuries from mass public shootings fall dramatically after right-to-carry concealed handgun laws are enacted. Between 1977 and 1995,206 the average death rate from mass shootings plummeted by up to 91% after such laws went into effect, and injuries dropped by over 80%.207

Myth: Concealed carry permit holders shoot police

Fact: The Violence Police Center started listing instances of CCW holders shooting police.208 From May 2007 through November 2009 (2.5 years) they recorded nine police deaths, three in one mass killing by a white supremacist using an AK-47 rifle. Of the nine, five had not yet had a trial or conviction as of the date of the report.

Myth: People with concealed weapons licenses will commit crimes

Fact: In Texas, citizens with concealed carry licenses are 14 times less likely to commit a crime. They are also five times less likely to commit a violent crime.209

Fact: People with concealed carry licenses are:210

---

204 Crime, Deterrence, and Right-to-Carry Concealed Handguns, Lott, John R., and Mustard, David B. J. of Legal Studies, vol.26, n.1, pp.1-68 (Jan. 1997): This study involved county level crime statistics from all 3,054 counties in the U.S., from 1977 through 1992. During this time ten states adopted right-to-carry laws. It is estimated that if all states had adopted right-to-carry laws, in 1992 the US would have avoided 1,400 murders, 4,200 rapes, 12,000 robberies, 60,000 aggravated assaults, and saved over $5,000,000,000 in victim expenses.

205 FBI, Uniform Crime Reports, 2004 - excludes Hawaii and Rhode Island - small populations and geographic isolation create other determinants to violent crime.

206 Federal legislation created a national gun-free schools policy, effective in 1996. Some criminologists maintain this created a new dynamic, encouraging mass murder on campus. Thus, after 1995, it is increasingly difficult to make comparisons based on the effects of CCWs and mass shootings.

208 Law Enforcement Officers Killed by Concealed Handgun Permit Holders, VPC, December 13, 2009

209 Texas Department of Public Safety and the U.S. Census Bureau, reported in San Antonio Express-News, September, 2000.

210 An Analysis of the Arrest Rate of Texas Concealed Carry Handgun License Holders as Compared to the Arrest Rate of the Entire Texas Population, William E. Sturdevant, PE, September 11, 1999.
• 5.7 times less likely to be arrested for violent offenses than the general public
• 13.5 times less likely to be arrested for non-violent offenses than the general public

Fact: The results for the first 30 states that passed “shall-issue” laws for concealed carry licenses are similar.

Fact: Even gun control organizations agree it is a non-problem, as in Texas, “because there haven’t been Wild West shootouts in the streets.”

Fact: Of 14,000 CCW licensees in Oregon, only 4 (0.03%) were convicted of the criminal (not necessarily violent) use or possession of a firearm.

Fact: “I’m detecting that I’m eating a lot of crow on this issue ... I think that says something, that we’ve gotten to this point in the year and in the third largest city in America there has not been a single charge against anyone that had anything to do with a concealed handgun.”

Fact: In Florida, a state that has allowed concealed carry since late 1987, you are twice as likely to be attacked by an alligator as by a person with a concealed carry permit.

---

211 Reports were as received. No selection or filtering process was used.
212 Violent crime rates are from inception of .shall issue. CCW through 2006, the most recent period available through the Bureau of Justice Statistics online database.
213 October 1987 through Jan 2008
214 1995, no follow-up data available at time of collection
215 1994 through 2007
216 1995 through 2004
217 2002 through 2006
218 In 2005 and 2006, Minnesota had an abnormal spike in robbery and aggravated assaults. The first three years of CCW in Minnesota saw violent crime rates being roughly stable and the problem has somewhat abated since then.
219 2001 through 2007
220 Nina Butts, Texans Against Gun Violence, Dallas Morning News, August 10, 2000
221 John Holmes, Harris County [Houston, TX] District Attorney, In Session: Handgun Law’s First Year Belies Fears of ‘Blood in the Streets,’ Texas Lawyer, December 9, 1996
Myth: 460 people have been killed by CCW permit holders

Fact: The "study" by gun control group Violence Policy Center covers a six year span, meaning that at worst there is an average of 76 shootings of all types per year, including justifiable homicides.

Fact: As of 2001, there are over 11,000,000 CCW holders, meaning the worst case kill rate (justifiable or not) is 0.004% of all CCW holders.

Myth: Concealed guns in bars will cause violence

Fact: In Virginia, in the first year where CCW holders were allowed to, the number of major crimes involving firearms at bars and restaurants statewide declined 5.2%. The crimes that occurred during the law’s first year were relatively minor.223

Myth: Texas CCW holders are arrested 66% more often

Fact: Compared to the entire population, Texas CCW holders are about 7.6 times less likely to be arrested for a violent crime.224 The numbers breakdown as follows:

- 214,000 CCW holders225
- 526 (0.2%) felony arrests of CCW holders that have been adjudicated
- 100 (0.05%) felony convictions

Fact: Most arrests cited are not any form of violent crime (includes bounced checks or tax delinquency).226

Fact: The Violence Policy Center “study” only includes arrests, not convictions.

---

223 Gun Crimes Drop at Virginia Bars And Restaurants, Richmond Times-Dispatch, August 14, 2011, reporting data from the Virginia State Police
224 Texas Department of Corrections data, 1996-2000, compiled by the Texas State Rifle Association, www.tsra.com
225 These are year 2000 records. As of 2014, the number of Texas concealed carry license holders was 825,957.
226 Basis For Revocation Or Suspension Of Texas Concealed, Texas Department of Public Safety, December 1, 1998
Fact: Many of these arrests in this premature VPC “study” came in the early years of Texas CCWs when the law was not understood by most of the law enforcement community or prosecutors.

Fact: A different study concludes that the four-year violent crime arrest rate for CCW holders is 128 per 100,000. For the general population, it is 710 per 100,000. In other words, CCW holders are 5.5 times less likely to commit a violent crime.227

Fact: “I lobbied against the law in 1993 and 1995 because I thought it would lead to wholesale armed conflict. That hasn’t happened. All the horror stories I thought would come to pass didn’t happen. No bogeyman. I think it’s worked out well, and that says good things about the citizens who have permits. I’m a convert.”228

Fact: “It has impressed me how remarkably responsible the permit holders have been.”229

Myth: CCWs will lead to mass public shootings

Fact: Multiple victim public shootings drop in states that pass shall-issue CCW legislation.230

Fact: CCW holders have prevented or curtailed mass public shootings. Pearl, Mississippi (Pearl Junior High School), Edinboro, Pennsylvania (Parker Middle School), Winnemucca, Nevada (Players Bar and Grill), Colorado Springs, Colorado (New Life Church).

Fact: Of all the alternatives to preventing mass public shootings, police officers believe that civilian concealed carry is the most effective. 86% also believe mass shooting “casualties would likely have been reduced” or “avoided altogether.”231

227 An Analysis Of The Arrest Rate Of Texas Concealed Handgun License Holders As Compared To The Arrest Rate Of The Entire Texas Population, William E. Sturdevant, PE, September 11, 1999
228 Glenn White, President of the Dallas Police Association, Dallas Morning News, December 23, 1997
229 Colonel James Wilson, Director Texas Department of Public Safety, Dallas Morning News, Jun 11, 1996
231 Gun Policy & Law Enforcement, PoliceOne, March 2013
Myth: People do not need concealable weapons

**Fact:** In 80% of gun defenses, the defender used a concealable handgun. A quarter of the gun defenses occurred in places away from the defender's home.232

**Fact:** 77% of all violent crime occurs in public places.233 This makes concealed carry necessary for almost all self-defense needs. But, due to onerous laws forbidding concealed carry, only 26.8% of defensive gun uses occurred away from home.234

**Fact:** Often, small weapons that are capable of being concealed are the only ones usable by people of small stature or with physical disabilities.

**Fact:** The average citizen doesn’t need a Sport Utility Vehicle, but driving one is arguably safer than driving other vehicles. Similarly, carrying a concealable gun makes the owner – and his or her community – safer by providing protection not otherwise available.

Myth: Police and prosecutors are against concealed carrying by citizens

**Fact:** In a survey of 15,000 officers, 91% said concealed carry should be permitted citizens “without question and without further restrictions.”235

**Fact:** 66% of police chiefs believe that citizens carrying concealed firearms reduce rates of violent crime.236

**Fact:** “All the horror stories I thought would come to pass didn’t happen ...I think it’s worked out well, and that says good things about the citizens who have permits. I’m a convert.”237

**Fact:** “I ... [felt] that such legislation present[ed] a clear and present danger to law-abiding citizens by placing more handguns on our streets. Boy was I wrong. Our experience in Harris County, and indeed statewide, has proven my fears absolutely groundless.”238

**Fact:** “Virginia has not turned into Dodge City. We have not seen a problem.”239

Fact: “The concerns I had – with more guns on the street, folks may be more apt to square off against one another with weapons – we haven’t experienced that.”²⁴⁰

Fact: “… to the best of my knowledge, we have not had an issue. I had expected there would be a lot more problems. But it has actually worked out.”²⁴¹

Fact: “Coming from California [where he was on the Los Angeles police force for 28 years], where it takes an act of Congress to get a concealed weapon permit, I got to Maine, where they give out lots of carrying concealed weapon permits, and I had a stack of CCW permits I was denying; that was my orientation. I changed my orientation real quick. Maine is one of the safest places in America. Clearly, suspects knew that good Americans were armed.”²⁴²

Fact: Explain this to the Law Enforcement Alliance of America, Second Amendment Police Department, and Law Enforcement for the Preservation of the Second Amendment, all of whom support the right to carry.

²⁴¹Lt. William Burgess of the Calhoun County (Michigan) Sheriff Department, Battle Creek Enquirer, January 28, 2005
²⁴²Detroit Police Chief James Craig, Detroit police chief: Legal gun owners can deter crime, The Detroit News, January 3, 2014
Licensing And Registration

Myth: Other countries register guns to fight crime

Fact: Most of these laws were enacted in the post-World War I period to prevent civil uprisings as had occurred in Russia. A report of “Committee on the Control of Firearms,” written by British Home Office officials in 1918, was the basis for registration in the U.K., Australia, Canada, and New Zealand.243

Fact: Although restrictions were few in the United States and the number of legally held handguns exceeded those on the Canadian side by a factor of ten, rates of homicide were nearly identical.244

Fact: Even so, registration does not prevent gun crimes. In a one week period, a licensed gun owner killed 12 people in England245 and a Chinese security guard killed three judges in a court building246 despite complete licensing and registration.

Myth: Gun registration works

Fact: Not in California. California has had handgun registration since 1909247 and it has not had any impact on violent crime rate.248

Fact: Not in New Zealand. They repealed their gun registration law in the 1980s after police acknowledged its worthlessness.249

Fact: Not in Australia. One report states, “It seems just to be an elaborate system of arithmetic with no tangible aim. Probably, and with the best of intentions, it may have been thought, that if it were known what firearms each individual in Victoria owned, some form of control may be exercised, and those who were guilty of criminal misuse could be readily identified. This is a

249 Background to the Introduction of Firearms User Licensing Instead of Rifle and Shotgun Registration Under the Arms Act 1983 (Wellington, New Zealand: n.p., 1983)
fallacy, and has been proven not to be the case.”  

In addition, cost to Australian taxpayers exceeded $200 million annually.  

Fact: Not in Canada. More than 20,000 Canadian gun-owners have publicly refused to register their firearms. Many others (as many as 300,000) are silently ignoring the law.  

- The provincial governments of Alberta, Saskatchewan, and Manitoba have dumped both the administration and the enforcement of all federal gun-control laws right back into Ottawa's lap, throwing the Canadian government into a paper civil war.  
- And all at a cost more than 1,646% the original projected cost (the original cost was estimated at 5% of all police expenditures in Canada). “The gun registry as it sits right now is causing law abiding citizens to register their guns but it does nothing to take one illegal gun off the street or to increase any type of penalty for anybody that violates any part of the legislation,” according to Al Koenig, President, Calgary Police Association. “We have an ongoing gun crisis, including firearms-related homicides lately in Toronto, and a law registering firearms has neither deterred these crimes nor helped us solve any of them,” according to Toronto police Chief Julian Fantino. 
- The system was so bad that six Canadian provinces (British Columbia, Manitoba, Saskatchewan, Alberta, Nova Scotia, and Ontario) refused to prosecute firearm owners who fail to register. 
- A bill to abolish the registry has been tabled (introduced) in the Canadian Parliament, which if passed, would eliminate the registry completely. 
- A Saskatchewan MP who endorsed the long gun registry when first proposed has introduced legislation to abolish it stating that, “[the registry] has not saved one life in Canada, and it has been a financial sinkhole … absolutely useless in helping locate the 255,000 people who have been prohibited from owning firearms by the courts.” 
- In April, 2012, the Canadian long gun registry was terminated.  

Fact: Not in Germany. The Federal Republic of Germany began comprehensive gun registration in 1972. The government estimated that between 17,000,000 and 20,000,000 guns were to be registered, but only 3,200,000 surfaced, leaving 80% unaccounted for.

259 $2 billion worth of police will save more lives than one gun registry, Garry Breitkreuz, National Post, February 27, 2009  
260 Why Gun Registration will Fail, Ted Drane, Australian Shooters Journal, May 1997
Fact: Not in Boston, Cleveland, or California. These cities and state require registration of “assault weapons.” The compliance rate in Boston and Cleveland is about 1%.261

Fact: Criminals don’t register their guns, nor are they legally required to do so.262

**Myth: Gun registration will help police find suspects**

Fact: Registration is required in Hawaii, Chicago and Washington DC. Yet there has not been a single case where registration was instrumental in identifying someone who committed a crime.263 Criminals very rarely leave their guns at the scene of the crime. Would-be criminals also virtually never get licenses or register their weapons.

Fact: It may cause police to shoot citizens unnecessarily. “My research into more than a dozen raids that turned out badly is that … the presence of a firearm wires officers into a much higher tendency to shoot. [T]he presence of a legally possessed firearm bought to protect the home may get totally innocent people killed by the police who casually use SWAT for drug search warrants especially if they register.”264

**Myth: Registration does not lead to confiscation**

Fact: It did in Canada. The handgun registration law of 1934 was the source used to identify and confiscate (without compensation) over half of the registered handguns in 2001.265

Fact: It did in Germany. The 1928 Law on Firearms and Ammunition (before the Nazis came into power) required all firearms to be registered. When Hitler came into power, the existing lists were used for confiscating weapons.

Fact: It did in Australia. In 1996, the Australian government confiscated over 660,000 previously legal weapons from their citizens.

Fact: It did in California. The 1989 Roberti-Roos Assault Weapons Control Act required registration. Due to shifting definitions of “assault weapons,” many legal firearms are now being confiscated by the California government.

Fact: It did in New York City. In 1967, New York City passed an ordinance requiring a citizen to obtain a permit to own a rifle or shotgun, which would then be registered. In 1991, the city

264 Joseph McNamara, former San Jose, California police chief, fellow at Stanford University’s Hoover Institution quoted in *California Gun Law Paves the Way for Confiscation*, Reason, January 2014

265 *Civil Disobedience In Canada: It Just Happened To Be Guns*, Dr. Paul Gallant, and Dr. Joanne Eisen, Idaho Observer, August 2000
passed a ban on the private possession of some semi-automatic rifles and shotguns, and “registered” owners were told that those firearms had to be surrendered, rendered inoperable, or taken out of the city.

**Fact:** It did in Bermuda, Cuba, Greece, Ireland, Jamaica, and Soviet Georgia as well.

**Myth: Licensing will keep bad people from obtaining or using guns**

**Fact:** Not in Canada. Canadian homicide rates were virtually unchanged before and after gun registration requirements were implemented (151 per 100,000 people in 1998 and 149 per 100,000 in 2002).\(^{266}\)

**Fact:** In New York State alone, approximately 100,000 persons are convicted of unlicensed operation of a motor vehicle each year, and this is probably a small proportion of the actual number of people who drive without a valid license.\(^{267}\) Licensing requirements don’t stop ineligible people from driving, and they do not stop ineligible people from acquiring guns.

**Fact:** As long as the unlicensed purchaser is never caught with the handgun, the unlawful sale will go unnoticed. The risk of detection is negligible. If the unlicensed handgun owner is arrested, he could claim that he did not need a license because he had owned this handgun before licensing went into effect.\(^{268}\)

**Fact:** Currently, federal prosecutors do not eagerly accept felon-in-possession cases for prosecution unless the felon is a hardened criminal who represents a threat to the public.\(^{269}\)

**Fact:** According to the Supreme Court, criminals do not have to obtain licenses or register their weapons, as that would be an act of self-incrimination.\(^{270}\)

**Fact:** Prohibition (which started as a ‘moderation’ movement) didn't keep people from drinking. Instead it turned millions of otherwise honest and sober citizens into criminals, overnight.

**Fact:** Most police do not see the benefit. “It is my belief that [licensing and registration] significantly misses the mark because it diverts our attention from what should be our common goal: holding the true criminals accountable for the crimes they commit and getting them off the street.”\(^{271}\)

---

\(^{266}\) Statistics Canada, Oct 1, 2003  
\(^{267}\) Journal of Criminal Law and Criminology, Northwestern University School of Law, 1998  
\(^{268}\) Journal of Criminal Law and Criminology, Northwestern University School of Law, 1998  
\(^{270}\) Haynes vs. U.S. 390 U.S. 85, 1968  
\(^{271}\) *When ‘Gun Control’ costs lives*, Bob Brooks, Firing Line, September 2001
Fact: In 2005, agencies reported 1,400 arrests of persons denied a firearm or permit; but the U.S. Department of Justice accepted only 135 of those denial cases for prosecution. Given the poor performance of the Federal government in prosecuting felons identified by an instant background check trying to buy firearms, there is little to support firearm licensing as a crime prevention measure.

Myth: Guns from the U.S. create crime in other countries

Fact: Canada, which shares the longest and most open border with the U.S., doesn’t think so, saying that guns from the U.S. are a “small part” of the problem.

272 Background Checks for Firearm Transfers 2005, U.S. Department of Justice, Office of Justice Programs, November 2006
273 Globe and Mail, Paul Culver, August 15, 2005
Myth: Accidental gun fatalities are a serious problem

Fact: Firearm misuse causes only a small number of accidental deaths in the U.S.\(^{274}\) For example, compared to being accidentally killed by a firearm, you are:

- Five times more likely to burn to death
- Five times more likely to drown
- 17 times more likely to be poisoned
- 17 times more likely to fall to your death
- And 68 times more likely to die in an automobile accident

Fact: In 2007, there were only 54 accidental gun deaths for children under age 13. About 12 times as many children died from drowning during the same period.\(^{275}\)

Fact: In 2007, there were 999 drowning victims and 137 firearm-related accidental deaths in age groups 1 through 19. This despite the fact that firearms outnumber pools by a factor of more than 30:1. Thus, the risk of drowning in a pool is nearly 100 times higher than dying from a firearm-related accident for everyone, and nearly 500 times for children ages 0-5.\(^{276}\)

Fact: Medical mistakes kill 400,000 people per year – the equivalent of almost three fully loaded Boeing 747 jet crashes per day – or about 286 times the rate of all accidental firearm deaths.\(^{277}\)

\(^{274}\) *WISQARS Injury Mortality Report*, Center for Disease Control, 2007

\(^{275}\) *WISQARS Injury Mortality Report*, Center for Disease Control, 2007

\(^{276}\) National Center for Health Statistics, and the National Spa and Pool Institute
This translates into 1 in 6 doctors causing an accidental death, and 1 in 56,666 gun owners doing the same.

**Fact:** Only 2% of gun deaths are from accidents, and some insurance investigations indicate that many of these may not be accidents after all.\(^{278}\)

**Fact:** Around 2,000 patients each year – six per day – are accidentally killed or injured in hospitals by registered nurses.\(^{279}\)

### Myth: Handguns are unsafe and cause accidents

**Fact:** Most fatal firearm accidents involve long guns, which are more deadly. These are typically hunting accidents.\(^{280}\)

**Fact:** Handguns have triggers that are difficult for small (child) hands to operate, and are rarely the cause of accidents.\(^{281}\)

### Myth: Innocent bystanders are often killed by guns

**Fact:** Less than 1% of all gun homicides involve innocent bystanders.\(^{282}\)

### Myth: Citizens are too incompetent to use guns for protection

**Fact:** About 11% of police shootings kill an innocent person – about 2% of shootings by citizens kill an innocent person. The odds of a defensive gun user killing an innocent person are less than 1 in 26,000\(^{283}\) despite American citizens using guns to prevent crimes almost 2,500,000 times every year.

**Fact:** Most firearm accidents are caused by people with various forms of poor self-control. These include alcoholics, people with previous criminal records, people with multiple driving accidents, and people who engage in other risky behaviors.\(^{284}\)

\(^{284}\) Targeting Guns: Firearms and Their Control, Gary Kleck, Aldine de Gruyter, 1997, at 307, 312
Myth: Gun accidents are flooding emergency rooms

Fact: The rate of gun accidents is so low that the U.S. Consumer Product Safety Commission doesn’t even mention them in their annual safety reports.

Myth: “Junk” guns are dangerous and should be banned

Fact: In the history of the state of California, not one lawsuit against a gun maker had been filed (until 2003) based on a weapon being defective or poorly designed. 285

Myth: Guns should be made to conform to product liability laws

Fact: Guns are already covered under product liability laws. If you have a defective gun that does not operate properly, you can sue the gun maker.

285 California Trial Lawyers Association, 1998
Government Laws And Social Costs

Myth: Gun control reduces crime

Fact: There are more than 22,000\textsuperscript{286} gun laws at the city, county, state, and federal level. If gun control worked, then we should be free of crime. Yet the U.S. government “found insufficient evidence to determine the effectiveness of any of the firearms laws or combinations of laws reviewed on violent outcomes”\textsuperscript{287} and also concluded in one study that none of the attackers interviewed was "hindered by any law – federal, state or local – that has ever been established to prevent gun ownership. They just laughed at gun laws."\textsuperscript{288}

Fact: Violent crime appears to be encouraged by gun control. Most gun control laws in the United States have been written since 1968, yet the murder rate rose during the 70s, 80s and early 90s.\textsuperscript{289}

Fact: In 1976, Washington, D.C. enacted one of the most restrictive gun control laws in the nation. The city's murder rate rose 134 percent through 1996 while the national murder rate has dropped 2 percent.\textsuperscript{290}

Fact: Among the 15 states with the highest homicide rates, 10 have restrictive or very restrictive gun laws.\textsuperscript{291}

\textsuperscript{286} Under the Gun: Weapons, Crime, and Violence in America, Bureau of Alcohol, Tobacco and Firearms estimate and reported via James Wright, Peter H. Rossi, Kathleen Daly, 1983

\textsuperscript{287} First Reports Evaluating the Effectiveness of Strategies for Preventing Violence: Firearms Laws, CDC, Task Force on Community Preventive Services, Oct 3, 2003 – a systematic review of 51 studies that evaluated the effects of selected firearms laws on violence

\textsuperscript{288} Violent Encounters: A Study of Felonious Assaults on Our Nation's Law Enforcement Officers, U.S. Department of Justice, August 2006

\textsuperscript{289} National Center for Health Statistics, Vital Statistics, Revised July, 1999

\textsuperscript{290} Dr. Gary Kleck, University of Florida using FBI Uniform Crime Statistics, 1997

\textsuperscript{291} Dr. Gary Kleck, University of Florida using FBI Uniform Crime Statistics, 1997
Fact: Maryland claims to have the toughest gun control laws in the nation and ranks #1 in robberies and #4 in both violent crime and murder.\textsuperscript{292} The robbery rate is 70\% more than the national average.\textsuperscript{293} These numbers are likely low because one of their more violent cities, Baltimore, failed to report their crime levels.

Fact: In 2000, 20\% of U.S. homicides occurred in four cities with just six percent of the population – New York, Chicago, Detroit, and Washington, D.C. – most of which had a virtual prohibition on privately owned handguns at the time.\textsuperscript{294}

Fact: The landmark federal Gun Control Act of 1968, banning most interstate gun sales, had no discernible impact on the criminal acquisition of guns from other states.\textsuperscript{295}

Fact: Washington, D.C.'s 1976 ban on the ownership of handguns (except those already registered in the District) was not linked to any reduction in gun crime in the nation's capital.\textsuperscript{296}

Fact: New York has one of the most restrictive gun laws in the nation – and 20\% of the armed robberies.\textsuperscript{297}

Fact: In analyzing 10 different possible reasons for the decline in violent crime during the 1990s, gun control was calculated to have contributed nothing (high imprisonment rates, more police and legalized abortion were considered the primary factors, contributing as much as 28\% of the overall reduction).\textsuperscript{298}

Myth: California’s tough gun laws reduced gun deaths

This myth, promoted primarily by the Law Center to Prevent Gun Violence and covering years 1993 through 2013, has three major flaws:

\textsuperscript{292} Index of Crime by State, FBI Uniform Crime Reports (UCR) for 2000, p. 79, Table 5
\textsuperscript{293} FBI Uniform Crime Reports, September 15, 2000
\textsuperscript{294} FBI Uniform Crime Reports, September 15, 2000
\textsuperscript{295} Under the Gun, Wright, Rossi, Daly, University of Massachusetts, 1981
\textsuperscript{296} Under the Gun, Wright, Rossi, Daly, University of Massachusetts, 1981
\textsuperscript{297} Under the Gun, Wright, Rossi, Daly, University of Massachusetts, 1981
\textsuperscript{298} Understanding Why Crime Fell in the 1990s, Steven Levit, Journal of Economic Perspectives, Winter 2004
• Suicides, which are 61%\(^{299}\) of gun deaths, fell much faster in California than the rest of the nation.
• At the starting point, California’s criminal gun death rate was much higher than the national average.
• California passed the first of two “three strike” laws in 1994, which began the process of incarcerating repeat violent offenders.

Thus none of the decline in California gun deaths is attributable to the state’s gun control laws.

**Myth: Guns should be registered and licensed like cars**

**Fact:** You do not need a license to buy a car. You can buy as many as you want and drive them all you like on your own property without a license.

**Fact:** Cars are registered because they are (a) sources of tax revenue, (b) objects of fraud in some transactions, and (c) significant theft targets. Thus we ask the government to track them.

**Fact:** There is no constitutionally guaranteed right to keep and bear automobiles, and thus they are subject to greater regulation than guns.

**Fact:** There are more guns in the U.S. than cars (228,000,000 guns and 207,754,000 automobiles). Yet you are 31 times more likely to be accidentally killed by a car than a gun according to the National Safety Council\(^{300}\) ... despite cars having been registered and licensed for almost 100 years.

**Myth: The Brady Bill caused a decrease in gun homicides**

**Fact:** All violent crime (including gun and non-gun murders) fell during the same period, 1992 to 1997. However, the percent of homicides committed with guns stayed the same. In 1992, 68% of murders were committed with guns; in 1997, it was still 68%.\(^{301}\) Thus, the decreased gun homicide rate was part of an overall declining crime rate, not an effect of the Brady Bill.

**Fact:** Gun possession by criminals has risen in the post-Brady years – 18% of state prisoners (was 16% before Brady) and 15% of federal prisoners (was 12% before Brady) were caught with firearms.\(^{302}\)

**Fact:** The Brady Bill is not enforced. In 2006, of 77,000 Field Office referrals for instant background check violations (25,259 of which NICS identified as buyers with felony records), 0.4% (273) were ever charged with a crime and 0.1% (73) were convicted.\(^{303}\)

\(^{299}\) Center for Disease Control, WISQARS online Fatal Injury Reports, 2010

\(^{301}\) FBI Uniform Crime Reports for 1992 and 1997

\(^{302}\) Firearm Use by Offenders, Bureau of Justice Statistics, November 2001
Fact: The Brady Bill has so far failed to appreciably save lives.\textsuperscript{304}

Fact: Violent crime started falling in 1991, three years before passage of the Brady Bill. The Brady Bill did not apply in 18 states, yet violent crime in those states fell just as quickly.\textsuperscript{305}

Fact: A majority of Americans agree that the bill is worthless. 51% believe the act has been ineffective at reducing violent crime, and 56% believe it has had no impact on reducing the number of homicides in the U.S.\textsuperscript{306}

**Myth: Gun laws are being enforced**

Fact: During the Clinton administration, federal prosecutions of gun-related crimes dropped more than 44 percent.\textsuperscript{307}

Fact: Of the 3,353 prohibited individuals that obtained firearms, the Clinton administration only investigated 110 of them (3.3%).\textsuperscript{308}

Fact: Despite 536,000 prohibited buyers caught by the National Instant (Criminal Background) Check System (NICS), only 6,700 people (1.25%) have been charged for these firearms violations. This includes 71% of the violations coming from convicted or indicted felons.\textsuperscript{309} None of these crimes were prosecuted by the Federal government in 1996, 1997, or 1998.\textsuperscript{310}

Fact: In 1998, the government prosecuted just eight children for gun law violations.\textsuperscript{311} In that same year, there were only:

- 8 prosecutions for juvenile handgun possession.
- 6 prosecutions for handgun transfer to juveniles.
- 1 prosecution for Brady Bill violations.

\textsuperscript{303} Enforcement of the Brady Act, 2006, Regional Justice Information Service, study funded by Bureau of Justice Statistics, Office of Justice Programs, U.S. Department of Justice
\textsuperscript{304} Dr. Jens Ludwig, Dr. Philip J. Cook, Journal of the American Medical Association, August 2000
\textsuperscript{306} Portrait of America survey, August 2000
\textsuperscript{307} Transactional Records Access Clearinghouse (TRAC) at Syracuse University covering 1992 through 1998
\textsuperscript{308} General Accounting Office (GAO) 2000 audit of the National Instant Check System between 11/30/98 and 11/30/99. This stat needs to be tempered by the fact that many initial rejections were due to database errors – false positives – where the buyer was later approved.
\textsuperscript{309} Bureau of Justice Statistics, Federal Firearm Offenders and Background Checks for Firearm Transfers, June 4, 2000
\textsuperscript{310} U.S. Justice Department statistics, 1999
\textsuperscript{311} U.S. Justice Department statistics, 1999
Fact: Some of the reasons listed for not prosecuting known gun criminals include “minimal federal interest” and “DOJ/U.S. Attorney policy”. 312

Fact: Half of referrals concerning violent criminals were closed without investigation or prosecution.313

Fact: The average sentence for a federal firearms violation dropped from 57 months to 46 months from 1996 to 1998.314

Fact: 18-20 year olds commit over 23% of all gun murders.315 None of these criminals are allowed by law to purchase a handgun, but the Federal government under Clinton rarely enforced this law.316

Fact: During Project Exile in Richmond, Virginia US prosecutors prosecuted felons caught with guns using Federal laws that require mandatory imprisonment. The first year result was a 33% drop in homicides for the Richmond Metro area in a year where the national murder rate was climbing.317 This shows that enforcement works. According to Andrew McBride of the Richmond Department of Justice Office, these cases are as easy to prosecute as "picking change up off the street."

Myth: Federal gun crime prosecutions increased 25%

Fact: 1992: 9,885 BATF referrals for federal firearm purchase violations
1998: 4,391 (a 56% drop)
1999: 5,489 (a fictitious “25% increase”)318

Fact: 1992: 12,084 BATF referrals for all firearm law violations
1998: 5,620 (a 53% drop)

Myth: The social cost of gun violence is enormous

Fact: Because guns are used an estimated 2.5 million times per year to prevent crimes, the cost savings in personal losses, police work, and court and prison expenses vastly outweighs the cost.

312 Bureau of Justice Statistics, Federal Firearm Offenders and Background Checks for Firearm Transfers, June 4, 2000
315 United States Treasury and Justice Department Report, 1999
316 Federal Firearm Offenders report, Bureau of Justice Statistics, June 4, 2000 – firearm suspects declined for prosecution by U.S. attorneys … some of the reasons listed for not prosecuting known gun criminals include “minimal federal interest” and “DOJ/U.S. Attorney policy”
317 FBI Uniform Crime Statistics, 1999
318 BATF, 1999
of criminal gun violence and gun accidents. The net savings, under a worst-case scenario, is about $3.5 billion a year.\textsuperscript{319}

\textbf{Fact:} Guns are used 65 times more often to prevent a crime than to commit one.\textsuperscript{320}

\textbf{Fact:} The medical cost of gun violence is only 0.16\% of America’s annual health care expenditures.\textsuperscript{321}

\textbf{Fact:} Drunken drivers killed 15,935 people in 1998\textsuperscript{322} while homicides with guns were 12,102 for the same year. Drunken drivers continue to kill people randomly despite a decade of increased strictness and social pressure against drunk drivers.

\textbf{Myth: The social cost of gun violence is $20-100 billion}

\textbf{Fact:} One “study”\textsuperscript{323} included the lifetime earnings of people that die from guns, not just the true social costs. This included lost incomes of criminals killed by law-abiding citizens, costs associated with suicides, the “emotional costs experienced by relatives and friends of gunshot victims, and the fear and general reduction in quality of life ... including people who are not victimized”. If the same methodology were used to calculate the social savings from private gun ownership, we would see a benefit to society of half a trillion dollars, or 10\% of the 1999 US Gross Domestic Product.

\textbf{Fact:} Another “study”\textsuperscript{324} started by polling people how much they would be willing to have their taxes raised in order to reduce firearm violence by 30\%, and then projected these bids to the entire U.S. population. This seriously flawed methodology does not measure the “cost” of the problem, just what people are willing to spend to reduce the problem.

\textbf{Fact:} Social saving from private ownership is not used in these studies. One study\textsuperscript{325} indicated between 240,000 and 300,000 defensive uses of firearms, as described by the victim, “... almost certainly had saved a life.”

\textbf{Myth: Gun “buy back” programs get guns off the streets}

\textbf{Fact:} According to the federal government, gun ‘buybacks’ have “no effect.”\textsuperscript{326}

\begin{footnotesize}

\begin{itemize}
    \item \textsuperscript{319} \textit{Suing Gun Manufacturers: Hazardous to Our Health}, Sterling Burnett, National Center for Policy Analysis, 1999
    \item \textsuperscript{320} Taking Dr. Gary Kleck’s estimate of 2.5 million gun defenses each year, divided by the FBI estimates of crimes committed with a firearm.
    \item \textsuperscript{321} \textit{Shooting in the dark: estimating the cost of firearm injuries}, Max W and Rice DP, Health Affairs, 1993
    \item \textsuperscript{322} Compiled by Mothers Against Drunk Driving (MADD)
    \item \textsuperscript{323} \textit{The Financial Costs of Gun Violence}, Linda Gunderson, Annals of Internal Medicine, September 21, 1999
    \item \textsuperscript{324} \textit{Gun Violence : The Real Costs}, Ludwig, Cook, 2000
    \item \textsuperscript{325} \textit{Armed Resistance To Crime}, Kleck, Gertz, Journal of Criminal Law and Criminology, vol. 86, no. 1, 1995: 150
\end{itemize}
\end{footnotesize}
**Fact:** “Buy backs” remove no more than 2% of the firearms within a community. And the firearms that are removed do not resemble guns used in crimes. “*There has never been any effect on crime results seen.*”\(^{327}\)

**Fact:** Up to 62% of people trading in a firearm still have another at home, and 27% said they would or might buy another within a year.\(^{328}\)

**Fact:** More than 50% of the weapons bought via a gun buyback program were over 15 years old, whereas almost half of firearms seized from juveniles are less than three years old.\(^{329}\)

**Fact:** 81% of police surveyed believe buybacks are ineffective in reducing gun violence.\(^{330}\)

**Fact:** According to a variety of sources, the actual effect is that gun buyback programs:

- Disarm future crime victims, creating new social costs
- Give criminals an easy way to dispose of evidence
- Acquire guns from those least likely to commit crimes (the elderly, women, etc.)
- Results in cheap guns being bought by private individuals then sold to the government for a profit
- Cause guns to be stolen and sold to the police, creating more crime
- Seldom return stolen guns to their rightful owners

**Fact:** "They do very little good. Guns arriving at buy backs are simply not the same guns that would otherwise have been used in crime. If you look at the people who are turning in firearms, they are consistently the least crime-prone [ed: least likely to commit crimes]: older people and women."\(^{331}\)

**Myth: Closing down “kitchen table” gun dealers will reduce guns on the street**

**Fact:** 43% of gun dealers had no inventory and sold no guns at all. Congressional testimony documented that the large number of low-volume gun dealers is a direct result of BATF policy. The BATF once prosecuted gun collectors who sold as few as three guns per year at gun shows, claiming that they were unlicensed, and therefore illegal, gun dealers. To avoid such harassment, thousands of American gun collectors became licensed gun dealers. Now the BATF claims not to have the resources to audit the paperwork monster it created.

\(^{327}\) Garen Wintemute, Violence Prevention Research Program, U.C., Davis, 1997  
\(^{328}\) Jon Vernick, John Hopkins Center for Gun Policy and Research, Sacramento and St. Louis studies  
\(^{329}\) District of Columbia buyback program, 1999  
\(^{330}\) Gun Policy & Law Enforcement survey, PoliceOne, March 2013  
\(^{331}\) David Kennedy, Senior Researcher, Harvard University Kennedy School Program in Criminal Justice, in appearance on Fox News, November 22, 2000
Fact: Reforms of the Federal Firearm Licensing program – mainly focused at small volume retailers and traders – produced no significant results in firearm crime rates.332

Myth: Only the government should have guns

Fact: Only if you want criminals to have them as well. Loose inventory controls are notorious in government agencies, as shown by the Immigration and Naturalization Service (INS) that has “misplaced” 539 weapons, including a gas-grenade launcher and 39 automatic rifles or machine guns. Six guns were eventually linked to crimes (two guns had been used in armed robberies, one was confiscated in a raid on a drug laboratory, two were seized others during arrests and one was being held as evidence in a homicide investigation).333 In July of 2001, it was reported that the FBI lost 449 weapons, including machine guns.

Myth: “Safe storage” laws protect people

Fact: 15 states that passed “safe storage” laws saw 300 more murders, 3,860 more rapes, 24,650 more robberies, and over 25,000 more aggravated assaults in the first five years. On average, the annual costs borne by victims averaged over $2.6 billion as a result of lost productivity, out-of-pocket expenses, medical bills, and property losses. "The problem is, you see no decrease in either juvenile accidental gun deaths or suicides when such laws are enacted, but you do see an increase in crime rates."334

Fact: Only five American children under the age of 10 died of accidents involving handguns in 1997.335 Thus, the need for “safe storage” laws appears to be low.

Fact: In Merced California, an intruder stabbed three children to death with a pitchfork. The oldest child had been trained by her father in firearms use, but could not save her siblings from the attacker because the gun was locked away to comply with the state’s “safe storage” law.336

Myth: Local background checks reduce gun suicides337

Fact: The research reports only a change in the “firearm suicide rate” and not the total suicide rate. No strict correlation between overall suicides and background checks exists.

332 Christopher Koper of Pennsylvania's Jerry Lee Center of Criminology, reported in Criminology & Public Policy, American Society of Criminology, March 2002
333 Associated Press report, April 17, 2001
335 Safe Storage Gun Laws: Accidental Deaths, Suicides, and Crime, Prof. John Lott, Yale School of Law, March 2000
336 Sierra Times and various wire services, September, 2000
337 This myth derives from Firearm Death Rates and Association with Level of Firearm Purchase Background Check, Steven A. Sumner, Layde, Guse, American Journal of Preventive Medicine, Volume 35, Issue 1, Pages 1-86 (July 2008)
Fact: The report did not explain the disparity between states that had local background checks and radically different suicide rates (Hawaii with 2.82/100,000 and Washington with 9.28/100,000). Nor did it explain how states with different levels of background checks have nearly identical suicide rates (Hawaii has local checks and a 2.82 firearm suicide rate while New York uses state checks and has a lower 2.72 rate).

Fact: The report was a two year snapshot, which makes trending impossible. Proper analysis would have examined change in suicide rates in states before and after background check policy changed.

Fact: Researchers split homicide and suicide propensity controls by age (65+ for suicides and 15-29 for homicides).
**Microstamping**

**Background:** Microstamping is a proposed means for imprinting unique serial numbers onto cartridges fired from a gun. Similar to “ballistic fingerprinting,” it allegedly helps police identify what firearm might have been used in a crime. Microstamping uses precision equipment to remove microscopic amounts of metal from the tip of the firing pin.

**Myth: Independent testing by forensic technologists shows the technology is reliable**

**Fact:** Firing pins are readily removable and swappable in most models of handguns, and with inexpensive replacement parts. Criminals who file down serial numbers on the sides of guns won’t hesitate to file or exchange firing pins.

**Fact:** 46% of impressions ranked as “unsatisfactory” (i.e., illegible) after only ten rounds.\(^{338}\)

**Fact:** Reloaded ammo (which is extremely common due to the economics of recycling casings and home reloading tools) will make prosecuting cases nearly impossible once the “reloaded ammo” defense is raised (for microstamping that imprints case sides). A case may have two or more markings, making the final shooter impossible to identify.

**Myth: Filing the firing pin will make the gun inoperable**

**Fact:** Firing pins are designed to be pushed deeply into the primer (igniter) of the round. The depth of the engraving (approximately 0.005 inch)\(^{339}\) is vastly smaller than the tolerance of the firing pins drive depth.

**Fact:** In a test, the engravings were removed using a 50-year-old knife sharpening stone in less than a minute. The firearm still operated correctly after the filing.\(^{340}\)

---

Myth: The cost per firearm will be cheap

Fact: The National Shooting Sports Foundation, the representative for firearm manufacturers, estimates the cost will be upwards of $150 per firearm, more than tripling the price of self-protection and making it unaffordable for low-income people.341 The Brady Campaign dispute those with firearm manufacturing experience claiming micro-stamping would cost only 50¢.

Myth: The numbers will let police find the gun’s owner and help solve crimes

Fact: Since many crime guns are stolen property,342 finding the original owner does not help solve the crime.

341 Etched bullets interest law enforcement, The Record, September 25, 2006
342 Armed and Considered Dangerous, U.S. Department of Justice, 1986
Ballistic Fingerprinting

Myth: Every firearm leaves a unique "fingerprint" that can pinpoint the firearm used

Fact: A group of National Research Council scientists concluded that this has not yet been fully demonstrated. Their research suggests that the current technology for collecting and comparing images may not reliably distinguish very fine differences.343

Fact: "Firearms that generate markings on cartridge casings can change with use and can also be readily altered by the users. They are not permanently defined like fingerprints or DNA."344

Fact: "Automated computer matching systems do not provide conclusive results."345

Fact: “Because bullets are severely damaged on impact, they can only be examined manually”.346

Fact: “Not all firearms generate markings on cartridge casings that can be identified back to the firearm.”347

Fact: The same gun will produce different markings on bullets and casings, and different guns can produce similar markings.348 Additionally, the type of ammunition actually used in a crime could differ from the type used when the gun was originally test-fired -- a difference that could lead to significant error in suggesting possible matches.349

Fact: The rifle used in the Martin Luther King assassination was test fired 18 times under court supervision, and the results showed that no two bullets were marked alike.350 “Every test bullet was different because it was going over plating created by the previous bullet.”

---

344 *Feasibility of a Ballistics Imaging Database for All New Handgun Sales*, Frederic Tulleners, California Department of Justice, Bureau of Forensic Services, October, 2001 (henceforth *FBID*)
345 *Feasibility of a Ballistics Imaging Database for All New Handgun Sales*, Frederic Tulleners, California Department of Justice, Bureau of Forensic Services, October, 2001 (henceforth *FBID*)
346 *Feasibility of a Ballistics Imaging Database for All New Handgun Sales*, Frederic Tulleners, California Department of Justice, Bureau of Forensic Services, October, 2001 (henceforth *FBID*)
347 *Feasibility of a Ballistics Imaging Database for All New Handgun Sales*, Frederic Tulleners, California Department of Justice, Bureau of Forensic Services, October, 2001 (henceforth *FBID*)
350 *Ballistics 'fingerprinting' not foolproof*, Baltimore Sun, October 15, 2002
Fact: "The common layman seems to believe that two bullets fired from the same weapon are identical, down to the very last striation placed on them by the weapon. The trained firearms examiner knows how far that is from reality."351

**Myth: A database of ballistic profiles will allow police to trace gun crimes**

Fact: The National Research Council deemed a national ballistics database as impractical due to practical limitations of current technology for generating and comparing images of ballistic markings.352

Fact: Maryland’s ballistics database “is not doing anything”353 and “has not met the mission statement of the state police.”354 In the first five years of implementation, it failed to lead to any criminal arrest or convictions, despite collecting over 80,000 specimens at a cost of $2,567,633.355

Fact: More than 70% of armed career criminals get their guns from "off-the-street sales" and "criminal acts" such as burglaries,356 and 71% of these firearms are stolen.357 Tracing these firearms will not lead to the criminals, as the trail stops at the last legal owner.

Fact: Computer image matching of cartridges fails between 38-62% of the time, depending on whether the cartridges are from the same or different manufacturers.358

Fact: “Automated computer matching systems do not provide conclusive results" requiring that “potential candidates be manually reviewed".359

Fact: Criminals currently remove serial numbers from stolen guns to hide their origin. The same simple shop tools can change a ballistic profile within minutes. “The minor alteration

---

353 *Maryland State Police Report Recommends Suspending Ballistics ID System*, Col. Thomas E. Hutchins, the state police superintendent, WBAL-TV web site, January 17, 2005
355 *MD-IBIS Progress Report #2*, Maryland State Police Forensic Sciences Division, September 2004
356 *Protecting America*, Bureau of Alcohol, Tobacco and Firearms, 1992
357 *Armed and Considered Dangerous*, U.S. Department of Justice, 1986
358 *Feasibility of a Ballistics Imaging Database for All New Handgun Sales*, Frederic Tulleners, California Department of Justice, Bureau of Forensic Services, October, 2001
359 *Feasibility of a Ballistics Imaging Database for All New Handgun Sales*, Frederic Tulleners, California Department of Justice, Bureau of Forensic Services, October, 2001
required less than 5 minutes of labor."360 Criminals will make changing ballistic profiles part of their standard procedures.

**Myth: Ballistic imaging is used in Maryland and New York and solves many crimes**

**Fact:** Not so far. New York has not reported a single prosecution based on matched casings or bullets361, 362, 363 and Maryland had only a single instance in 2005.364 The cost for this lack of success in Maryland exceeds $2,500,000 a year, and in New York it exceeds $4,000,000.

**Fact:** In Syracuse, the police have submitted fewer than 400 handguns for ballistic testing over a three-year span because the system is inefficient.365

**Myth: A ballistic database is inexpensive to create/maintain**

**Fact:** “... [A] huge inventory [of possible matches] will be generated for manual review.” “[The] number of candidate cases will be so large as to be impractical and will likely create logistic complications so great that they cannot be effectively addressed.”366

**Myth: Police want a ballistic database**

**Fact:** “The National Fraternal Order of Police does not support any Federal requirement to register privately owned firearms with the Federal government,” the group said. “And, even if such a database is limited to firearms manufactured in the future, the cost to create and maintain such a system, with such small chances that it would be used to solve a firearm crime, suggests to the F.O.P. that these are law enforcement dollars best spent elsewhere.”367

**Fact:** “We in law enforcement know it will not, does not, cannot work. Then, no one has considered the hundreds of millions of guns in the US that have never been registered or tested or printed.”368

**Fact:** “One, the barrel is one of the most easily changed parts of many guns and two, the barrel, and the signature it leaves on a bullet, is constantly changing.”369

**50 Caliber Rifles**

**Myth: .50-calibers are the favorite weapon of terrorists**

**Fact:** Most terrorist attacks are in the form of bombings (90%). Other acts, such as kidnapping (6%), armed attack (2%), arson (1%), firebombing (1%), and other methods (2%), are far less common. Of the “armed attacks,” the most common weapons used are fully-automatic AK-47 rifles.

**Fact:** A single .50 caliber rifle costs upwards of $10,000, yet terrorists can buy the favored AK-47 in Pakistan for less than $200. History shows they opt for the AK-47.

**Fact:** .50-caliber rifles are heavy (20-35 pounds), expensive (from $3,000 to $10,000 each, with ammunition costing $2-$5 for each round), impossible to conceal (typically four feet long), usually single shot (slow to reload), and impractical for terrorists.

**Fact:** .50-caliber rifles have only been used in 18 crimes in the history of the United States.  

**Myth: American gun makers sold .50-calibers to terrorists**

**Fact:** This “study” by the anti-gun Violence Policy Center was inaccurate. The rifles in question were sold to the United States government. Years later, the U.S. government gave the rifles to Afghan freedom fighters to defeat the former Soviet Union. There is no direct connection between gun makers and terrorists, and none of the rifles have been used in terrorist actions.

**Myth: .50-caliber shooters are terrorists in training**

**Fact:** The average .50-caliber enthusiast is a successful businessman with an annual income of $50,000 or more – hardly a terrorist profile.

---

370 *Facts and Figures About Terrorism*, Dexter Ingram, Heritage Foundation, September 14, 2001 (some attacks had multiple methods which accounts for a total in excess of 100%).

372 Barret Manufacturing letter on their web site available January 12, 2001. This was confirmed during a visit by the BATF according to Dave Kopel in a National Review article “Guns and (Character) Assassination”, December 21, 2001.

373 John Burtt, Fifty Caliber Shooters Policy Institute, Congressional testimony
Myth: The Founding Fathers would have had no use for a .50-caliber rifle

Fact: Common guns of the early American republic were larger than .50-caliber, many measuring up to .812 caliber. The famous Kentucky Rifle (a name eventually given to most rifles made by German immigrants) was usually between .60 to .75-caliber.

Myth: .50-calibers are capable of piercing airline fuel tanks from a mile away

Fact: Most expert long distance shooters cannot hit a stationary target under perfect, windless conditions at such distances (one notable exception in Vietnam374).

Ill-trained terrorists shooting a high-recoil .50-caliber rifle at fast moving targets – a 280 mph airplane – have no chance.

Fact: The only known uses of .50-caliber weapons in downing aircraft have been military aircraft using fully-automatic machine guns spraying fire while in combat against other aircraft, and as sniper fire on stationary aircraft (i.e., on the ground) on enemy airfields. Not even the military's best sharp shooters are going to ignite a jet's fuel tank when the jet is flying between 200-300 miles per hour.

Myth: .50-caliber bullets can penetrate concrete bunkers

Fact: "It takes 300 rounds to penetrate 2 meters of reinforced concrete at 100 meters."375 At $5 per round, it would cost a terrorist $1,500 in ammunition to shoot into one bunker.

Myth: .50-caliber bullets can pierce light armor at 4 miles376

Fact: "At 35 meters distance [0.5% of the mythical “four mile” distance], a .50-caliber round will go through one inch armor plate."377 Piercing any armor at four miles is highly improbable.

Fact: "It is exceedingly difficult to hit a target, even a large one … at anything over 1200 to 1500 yards by even highly trained individuals … The ammo is designed for a machine gun, and is generally only good for 2-3 minute of angle [fraction of a degree] of accuracy. That equates to a

---

30-45 inch circle at 1500 yards with a perfect rifle, no wind or other conditions and a trained shooter.\textsuperscript{378}

**Myth: .50-caliber rifles can knock a helicopter from the sky**

**Fact:** The terminal energy of a .50-caliber (6,000 ft-lbs) is not enough to knock a modern military aircraft from the sky unless it hits a critical component like a fuel line. Records exist showing this has been done with common, smaller caliber assault rifles such as AK-47s.

**Myth: .50-caliber guns are for snipers**

**Fact:** Americans have been long-distance target shooters since revolutionary times. According to period writings, Americans were shooting small targets at upwards of 150 yards using simple Kentucky long rifles and muskets.\textsuperscript{379}

**Fact:** “The use of [.50-caliber] by the IRA in Northern Ireland to shoot both soldiers and police officers at very short range (never more than 275 yards) also gave the weapon a worldwide notoriety when the world's media slapped a ‘sniper’ label on the terrorists taking the shots. They obviously were not and soon ran scared when professional snipers were deployed to stop them.”\textsuperscript{380}

\textsuperscript{379} Firearms Ownership & Manufacturing in Early America, Clayton Cramer, unpublished.

Guns In Other Countries

Myth: Countries with strict gun control have less crime

Fact: In America, we can demonstrate that private ownership of guns reduces crime, but from country to country there is no correlation between gun availability and the violent crime rate. Consider this:

Or, to use detailed data, we can contrast the per capita homicide rate with the per capita gun ownership rate between different industrialized countries (see graph below). Contrasting the data shows zero correlation between the availability of guns and the overall homicide rate.

Fact: Countries with the strictest gun-control laws also tended to have the highest homicide rates.381

Fact: According to the U.N., as of 2005, Scotland was the most violent country in the developed world, with people three times more likely to be assaulted than in America. Violent crime there has doubled over the last 20 years. 3% of Scots had been victims of assault compared with 1.2% in America.382

Fact: “... the major surveys completed in the past 20 years or more provides no evidence of any relationship between the total number of legally held firearms in society and the rate of armed crime. Nor is there a relationship between the severity of controls imposed in various countries or the mass of bureaucracy involved with many control systems with the apparent ease of access to firearms by criminals and terrorists.”383

---

381 Violence, Guns and Drugs: A Cross-Country Analysis, Jeffery A. Miron, Department of Economics, Boston University, University of Chicago Press Journal of Law & Economics, October 2001
382 Scotland tops list of world's most violent countries, The Times, September 19, 2005
383 Minutes of Evidence, Colin Greenwood, Select Committee on Northern Ireland Affairs, January 29, 2003
Fact: Even if we examine just firearm ownership and firearm homicide by country, we see no correlation between the two.384

Fact: Switzerland has relatively lenient gun control for Europe385, and has the third-lowest homicide rate of the top nine major European countries, and the same per capita rate as England and Wales.386

Fact: Indeed, the Swiss basically have a military rifle in nearly every closest. “Everybody who has served in the army is allowed to keep their personal weapon, even after the end of their military service.”387

Fact: “We don’t have as many guns [in Brazil] as the United States, but we use them more.”388 Brazil has mandatory licensing, registration, and maximum personal ownership quotas. It now bans any new sales to private citizens. Their homicide rate is almost three (3) times higher than the U.S.389

Fact: In Canada around 1920, before there was any form of gun control, their homicide rate was 7% of the U.S rate. By 1986, and after significant gun control legislation, Canada’s homicide rate was 35% of the U.S. rate – a significant increase.390 In 2003, Canada had a violent crime rate more than double that of the U.S. (963 vs. 475 per 100,000).391

Fact: Many of the countries with the strictest gun control have the highest rates of violent crime.
Australia and England, which have virtually banned gun ownership, have the highest rates of robbery, sexual assault, and assault with force of the top 17 industrialized countries.\(^{392}\)

**Fact:** The crime rate is 66% higher in four Canadian Prairie Provinces than in the northern US states across the border.\(^{393}\)

**Fact:** Strict controls over existing arms failed in Finland. Despite needs-based licensing, storage laws and transportation restrictions,\(^{394}\) Finland experienced a multiple killing school shooting in 2007.\(^{395}\)

**Myth:** Britain has strict gun control and a low crime rate

**Fact:** Since gun banning has escalated in the UK, the rate of crime – especially violent crime – has risen.

**Fact:** Ironically, firearm use in crimes in the UK has *doubled* in the decade since handguns were banned.\(^{396}\)

**Fact:** Britain has the highest rate of violent crime in Europe, more so than the United States or even South Africa. They also have the second highest overall crime rate in the European Union. In 2008, Britain had a violent crime rate nearly five times higher than the United States (2034 vs. 446 per 100,000 population).\(^{397}\)

**Fact:** 67% of British residents surveyed believed that “As a result of gun and knife crime [rising], the area I live in is not as safe as it was five years ago.”\(^{398}\)

**Fact:** U.K. street robberies soared 28% in 2001. Violent crime was up 11%, murders up 4%, and rapes were up 14%.\(^{399}\)

\(^{392}\) *Criminal Victimization in Seventeen Industrialized Countries*, Dutch Ministry of Justice, 2001

\(^{394}\) *National Report by Finland*, United Nations Office for Disarmament Affairs

\(^{395}\) Pekka-Eric Auvinen shooting in Tuusula, Finland on November 8, 2007

\(^{396}\) *Weapons sell for just £50 as suspects and victims grow ever younger*, The Times, August 24, 2007

\(^{397}\) *The most violent country in Europe: Britain is also worse than South Africa and U.S.*, Daily Mail, July 3, 2009, citing a joint report of the European Commission and United Nations

\(^{398}\) *YouGov survey of 2,156 residents in Sept 2007*
Fact: This trend continued in the U.K in 2004 with a 10% increase in street crime, 8% increase in muggings, and a 22% increase in robberies.

Fact: In 1919, before it had any gun control, the U.K. had a homicide rate that was 8% of the U.S. rate. By 1986, and after enacting significant gun control, the rate was 9% – practically unchanged.400

Fact: “... [There is] nothing in the statistics for England and Wales to suggest that either the stricter controls on handguns prior to 1997 or the ban imposed since have controlled access to such firearms by criminals.”401

Fact: Comparing crime rates between America and Britain is fundamentally flawed. In America, a gun crime is recorded as a gun crime. In Britain, a crime is only recorded when there is a final disposition (a conviction). All unsolved gun crimes in Britain are not reported as gun crimes, grossly undercounting the amount of gun crime there.402 To make matters worse, British law enforcement has been exposed for falsifying criminal reports to create falsely lower crime figures, in part to preserve tourism.403

Fact: An ongoing parliamentary inquiry in Britain into the growing number of black market weapons has concluded that there are more than three million illegally held firearms in circulation – double the number believed to have been held 10 years ago – and that criminals are more willing than ever to use them. One in three criminals under the age of 25 possesses or has access to a firearm.404

Fact: Handgun homicides in England and Wales reached an all-time high in 2000, years after a virtual ban on private handgun ownership. More than 3,000 crimes involving handguns were recorded in 1999-2000, including 42 homicides, 310 cases of attempted murder, 2,561 robberies and 204 burglaries.405

399 British Home Office, reported by BBC news, July 12, 2002
400 Targeting Guns, Gary Kleck, Aldine Transaction, 1997, at 359
401 Minutes of Evidence, Colin Greenwood, Select Committee on Northern Ireland Affairs, January 29, 2003
402 Fear in Britain, Gallant, Hills, Kopel, Independence Institute, July 18, 2000
403 Crime Figures a Sham, Say Police, Daily Telegraph, April 1, 1996
404 Reported in The Guardian, September 3, 2000
405 42 killed by handguns last year, The Times, January 10, 2001, reporting on statistics supplied by the British Home Office
Fact: Handguns were used in 3,685 British offenses in 2000 compared with 2,648 in 1997, an increase of 40%.\textsuperscript{406} It is interesting to note:

- Of the 20 areas with the lowest number of legal firearms, 10 had an above average level of “gun crime.”
- Of the 20 areas with the highest levels of legal guns, only 2 had armed crime levels above the average.

Fact: Between 1997 and 1999, there were 429 murders in London, the highest two-year figure for more than 10 years – nearly two-thirds of those involved firearms – in a country that has virtually banned private firearm ownership.\textsuperscript{407}

Fact: Over the last century, the British crime rate was largely unchanged. In the late nineteenth century, the per capita homicide rate in Britain was between 1.0 and 1.5 per 100,000.\textsuperscript{408} In the late twentieth century, after a near ban on gun ownership, the homicide rate is around 1.4.\textsuperscript{409} This implies that the homicide rate did not vary with either the level of gun control or gun availability.

Fact: The U.K. has strict gun control and a rising homicide rate of 1.4 per 100,000. Switzerland has the highest per capita firearm ownership rate on the planet (all males age 20 to 42 are required to keep rifles or pistols at home) and has a homicide rate of 1.2 per 100,000. To date, there has never been a schoolyard massacre in Switzerland.\textsuperscript{410}

Fact: “… the scale of gun crime in the capital [London] has forced senior officers to set up a specialist unit to deal with … shootings.”\textsuperscript{411}

Myth: Gun control in Australia is curbing crime

Fact: Homicides were falling before the Australian firearm ban, matching a global downward trend in most industrialized countries. However, non-firearm homicides are relatively stable in Australia.

Fact: Crime has been rising since enacting a sweeping ban on private gun ownership. In the first two years after Australian gun-owners were forced to surrender 640,381 personal firearms, government statistics showed a dramatic increase in criminal activity.\footnote{Crime and Justice - Crimes Recorded by Police, Australian Bureau of Statistics, 2000} In 2001-2002, homicides were up another 20\%.\footnote{Report #46: Homicide in Australia, 2001-2002, Australian Institute of Criminology, April 2003}

From the inception of firearm confiscation to March 27, 2000, the numbers are:

- Firearm-related murders were up 19%
- Armed robberies were up 69%
- Home invasions were up 21%

The sad part is that in the 15 years before the national gun confiscation:

- Firearm-related homicides dropped nearly 66%
- Firearm-related deaths fell 50%

Fact: Gun crimes have been rising throughout Australia since guns were banned. In Sydney alone, robbery rates with guns rose 160% in 2001, more than in the previous year.\footnote{Costa targets armed robbers, The Sydney Morning Herald, April 4, 2002}

Fact: A ten year Australian study has concluded that firearm confiscation had no effect on crime rates.\footnote{Gun Laws and Sudden Death: Did the Australian Firearms Legislation of 1996 Make a Difference?, Dr. Jeanine Baker and Dr. Samara McPhedran, British Journal of Criminology, November 2006.} A separate report also concluded that Australia’s 1996 gun control laws “found [no] evidence for an impact of the laws on the pre-existing decline in firearm homicides”\footnote{Austrian firearms: data require cautious approach, S. McPhedran, S. McPhedran, and J. Baker, The British Journal of Psychiatry, 2007, 191:562} and yet...
another report from Australia for a similar time period indicates the same lack of decline in firearm homicides.417

**Fact:** Despite having much stricter gun control than New Zealand (including a near ban on handguns) firearm homicides in both countries track one another over 25 years, indicating that gun control is not a control variable.418

**Myth: Japan has strict gun control and a less violent society**

**Fact:** In Japan, the total murder rate is almost 1 per 100,000. In the U.S., there are about 3.2 murders per 100,000 people each year by weapons other than firearms.419 *This means that even if firearms in the U.S. could be eliminated, the U.S. would still have three times the murder rate of the Japanese.*

**Myth: Gun bans elsewhere work**

**Fact:** Though illegal, side-street gun makers thrive in the Philippines, primarily hand crafting exact replicas of submachine guns, which are often the simplest type of gun to manufacture. Estimates are that almost half of all guns in the Philippines are illegal.420

**Fact:** Chinese police destroyed 113 illegal gun factories and shops in a three-month crackdown in 2006. Police seized 2,445 tons of explosives, 4.81 million detonators and 117,000 guns.421

**Myth: The U.S. has the highest rate of firearm deaths among 25 high-income countries**

**Fact:** 60% of American “gun deaths” are suicides422 and the U.S. has a suicide rate 11% higher423 than international averages. This accounts for most of the difference.

**Fact:** The U.S. has a violent crime rate lower than 12 of seventeen industrialized countries424 due in large part to the 2.5 million annual defense gun uses.425

424 *Criminal Victimization in Seventeen Industrialized Countries*, Dutch Ministry of Justice, 2001
Myth: The United States has the highest violence rate because of lax gun control

**Fact:** The top 100 countries for homicide do not include the U.S.\(^{426}\) The top ten countries all have near or total firearm bans.

Myth: The United States is the source of 90% of drug syndicate guns in Mexico

**Fact:** This is an often misquoted data point from the BATFE, who said 90% of the firearms that have been *interdicted in transport* to Mexico or recovered in Mexico came from the United States. Thus the 90% number includes only the firearms American and Mexican police stop in transport.\(^{427}\)

**Fact:** The original 90% number was derived from the number of firearms successfully traced, not the total number of firearms criminally used. For 2007-2008, Mexican officials recovered approximately 29,000 firearms from crime scenes and asked for BATFE traces of 11,000. Of those, the BATFE could trace roughly 6,000 of which 5,114 were confirmed to have come from the United States. Thus, 83% of the crime guns recovered in Mexico have not been or cannot be traced to America and the real number is most likely 17%.\(^{428}\)

**Fact:** Mexican drug syndicates can buy guns anywhere. For the relatively under-powered civilian rifles coming from the United States, drug runners would pay between 300% and 400% above the market price. Thus they can and are buying guns around the world.\(^{429}\)

**Fact:** Mexican drug cartels – with $40 billion in annual revenues – have military armament that includes hand grenades, grenade launchers, armor-piercing munitions, antitank rockets and

assault *rifles* smuggled in from Central American countries.\(^{430}\) These are infantry weapons bought from around the world and not civilian rifles from the United States.

**Myth: Mexico seizes 2,000 guns a day from the United States**

**Fact:** The Mexican attorney general’s office reports seizing a total of 29,000 weapons in all of 2007 and 2008, or about 14,500 weapons a year. And that is *all* types of weapons, regardless of country of origin.\(^{431}\) Had they actually seized approximately 2,000 weapons per day, the total number of seized guns would be closer to 1,460,000.

**Myth: Thousands of guns go into Mexico from the U.S. every day**

**Fact:** In Senate Committee testimony, the BAFTE said the number was likely at worst to be in the “hundreds”.\(^{432}\) As evidenced above, for 2007 and 2008, the average for all firearms seizures was closer to 40 per day (29,000 guns/730 days), and only a fraction of these came from the USA by any means.

\(^{432}\) Senate Committee Judiciary, William Hoover, Assistant Director, Bureau of Alcohol, Tobacco, & Firearms, March 17, 2009
Myth: Gun owners are a tiny minority

**Fact:** The Federal government once estimated that there were well over 65 million gun owners in the U.S. and more than 50% were handgun owners.\(^{433}\) This number is generally considered low due to the reluctance of many to admit to a government agency that they own a gun. Other estimates indicate that between 41% and 49% of U.S. households are gun-owning households.

**Fact:** 43% of Americans claim that they own a gun.\(^{434}\)

Myth: People do not believe that the Second Amendment is an individual right

**Fact:** A Gallup survey confirms that 73% of Americans believe the 2\(^{nd}\) Amendment “guarantees” the right to keep guns, and that a mere 20% believe it exists to enable state militias.\(^{435}\)

**Fact:** Surveys show that "52% say it is more important to protect the right of Americans to own guns, while 46% say it is more important to control gun ownership."\(^{436}\) The split was 29% to 66% in 1999, showing that approval of Second Amendment protections is growing.

**Fact:** A Zogby poll\(^ {437}\) conducted after the big gun control initiatives of the year 2000 concluded that 75% of Americans believe the right to keep and bear arms is an individual right. In the same year ABC determined the rate to be 77%.\(^ {438}\)

437 *SAF survey of 1,015 likely voters*, Zogby, June 2002
438 ABC News, May 14, 2002
**Myth: Most Americans favor gun control**

**Fact:** Few "surveys" conducted in this country on the subject of gun control are unbiased. Professional survey designers have criticized both Harris and Gallup gun surveys for their construction – that the surveys have been designed to reach a desired conclusion.  

**Fact:** A 2014 Gallup Poll showed that fewer than half of Americans favored stricter gun control, which extended a long-term trend. Barely more than a quarter favor banning handguns (rendered a moot point by the 2008 *Heller* Supreme Court decision).

**Fact:** Americans believe that parents and popular culture are more responsible for violence in America than firearms.

**Fact:** A 1999 survey by the Associated Press showed:

- A plurality (49%) felt enforcing existing laws was the key to reducing violent crime.
- 52% felt that background checks did not help reduce the number of crimes committed with guns.

**Fact:** A 2000 Zogby telephone survey of 1,201 adults concluded that, by almost a two-to-one margin, Americans prefer enforcement of existing laws instead of new and tougher gun legislation to fight crime. The same poll found that 68% of the public disagrees with cities suing gun makers for the criminal misuse of guns.

**Fact:** A December 2000 Zogby poll of 1,028 American adults showed that they felt enforcing current laws was the “best way to solve gun violence in America.”

---

439 Often these surveys use questions like "If it reduced crime, would you favor stronger gun control laws?" These questions are rephrased in headline to read "Americans demand gun control" while ignoring the leading goal of reducing crime. These surveys also fail to ask counter balancing questions to prove/disprove any bias in questions. A counter-balancing question might be: "If it were shown that gun control laws were ineffective in preventing crime, would you favor enacting more gun control laws?"

Fact: A January 2001 Zogby, *American Values* poll found that 66% of voters felt that the U.S. should spend more money enforcing current laws including mandatory jail time for those who commit a crime with a handgun, while only 26% felt there should be more gun control laws including mandatory gun locks.

Fact: 52% of Americans in 2006 do not believe more gun control is needed.\(^{441}\)

Fact: Only 39% believe stricter gun control is needed, down from 43% in an earlier poll.\(^{442}\)

Fact: An Associated Press poll in April, 2000 showed 42% thought stricter enforcement was more likely to cut gun violence. Only 33% said enacting tougher gun laws was better.

Fact: A survey in April, 2000 by ABC News/Washington Post asked whether "passing stricter gun control laws" or "stricter enforcement of existing laws" is the best way to curb gun violence. Enforcement was preferred by 53% to 33%.

Fact: 58% percent of Americans believe better enforcement of existing laws "is a better way to reduce handgun violence" than new gun control laws.\(^{443}\)

Fact: A 1999 survey by CBS (hardly a pro-gun organization) found these responses:

- Only 14% of Americans believe that gun control can prevent violence with guns.
- 56% of people said enforcement of existing laws is the better way to reduce violent crime than new gun control laws.
- Only 4% said gun control should be a top issue for the government.

Time Magazine, survey of 33,202 adult Americans, 1998
**Assorted Myths**

**Myth: 30,000 people are killed with guns every year.**

**Fact:** 61% of these deaths are suicides\(^{451}\) (80% in Canada\(^{452}\)). Numerous studies have shown that the presence or absence of a firearm does not change the overall (i.e., gun plus non-gun) suicide rate. This 30,000 number also includes justifiable homicides (self-defense) and accidents.

**Myth: Gun ownership is falling in the United States**

**Fact:** Two surveys (ABC/POST and Gallup) show household ownership rates have remained steady, while two others (Pew and GSS) show ownership dropping. The former report on registered voters, who have to be citizens to vote in federal elections. The latter polls everyone regardless of citizenship status. With the non-citizen population growing 37% in less than 30 years, and now claiming about 11% of the total population, this is a key differentiator.

455 Gun Policy & Law Enforcement, PoliceOne, March 2013
456 Bringing the global gun crisis under control, IANSA, 2006 citing Small Arms Survey.
Unless the context dictates otherwise, no distinction is intended between commercial firearms (e.g. hunting rifles), and small arms and light weapons designed for military use (e.g. assault rifles)."\[^{458}\]

**Myth: High capacity magazines lead to more deadly shootings**

**Fact:** Much of this myth comes from the fact that the general availability of high-capacity handguns briefly preceded the rise in the crack cocaine trade, which brought a new kind of violence in local drugs wars.\[^{459}\]

**Fact:** The number of shots fired by criminals has not changed significantly even with the increased capacity of handguns and other firearms. Indeed, the number of shots from revolvers (all within 6-8 round capacity) and semi-automatics were about the same – 2.04 vs. 2.53.\[^{460}\] In a crime or gun battle, there is seldom time or need to shoot more.

**Fact:** The average magazine swap time for a non-expert shooter is 2-3 seconds. In the case of the Newtown Sandy Hook massacre, the murderer performed 10 magazine changes, or about 30 of the ~600 seconds that lapsed from him entering the building to when the police arrived. A 10 round restriction would have raised it to only 46 seconds and thus would have saved nobody.

**Fact:** Firearm homicides declined from 6.3 to 4.2 (per 100,000 population) from 1981 through 1998, when the increase in semi-automatics and large capacity handguns were rising at a fast rate.\[^{461}\] Fatal shootings of police officers declined sharply from 1988 through 1993.\[^{462}\]

**Fact:** Drug dealers tend to be “more deliberate in their efforts to kill their victims by shooting them multiple times.”\[^{463}\]

**Fact:** At least 61% of mass public shooters showed signs of mental instability in the days, weeks or months before their massacres.\[^{464}\] The rate might be higher because privacy laws prevent fully exploring the mental health history of some killers.

\[^{461}\] Center for Disease Control WISQARS.
\[^{462}\] Firearm injury from crime, Marianne Zawitz, 1996, Bureau of Justice Statistics.
\[^{464}\] Mass Shootings: Maybe What We Need Is a Better Mental-Health Policy, Mother Jones, Nov 2012, analysis of 62 mass public shootings
Myth: The “powerful gun industry” stops all gun control legislation

Fact: The firearms industry is composed of "small, marginally profitable companies," with combined revenues of $1.5 billion to $2 billion per year, making it politically ineffective.465

Fact: Total political contributions from firearm industry members, PACs and employees was under $4.4 million in the 2002 election cycle, which made the industry the 64th ranked contributor. Compare that to $33 million from the American Federation of State, County & Municipal Employees.466

Fact: Perhaps the "gun industry" being referenced is the 100+ million adults who peacefully own firearms and do not want their civil rights restricted.

Myth: Access to guns increases the risk of suicide

Fact: The rate of suicide is not affected by the presence of a firearm. This is true in either a time-series analysis (like the chart at right showing the change in handgun supply in the U.S. over time),467 or through cross-national analysis. For example, Japan has no private handgun ownership (aside from an extremely limited number of licensed Olympic sport shooters), and yet had a suicide rate more than twice that of the United States in 2002.468

Myth: Individuals who commit suicide are more likely to have had access to guns469

Fact: This is a classic causal effect. If someone decides to commit suicide, and they choose to use a gun, they will first acquire a gun. As noted before, the total rate of suicide does not change when a gun is present because the victim will choose a different method.

466 OpenSecrets.org, May 2003.
468 FBI Uniform Crime Statistics, World Health Organization Suicide Prevention country reports (online).
Myth: The only purpose for a gun is to kill people

**Fact:** Guns are used for self-defense 2,500,000 times a year in the United States. ⁴⁷⁰

**Fact:** Guns are used as a deterrent to crime even when no rounds are fired. ⁴⁷¹

**Fact:** Guns are used in sports including hunting, target practice, practical pistol, scenario simulation, skeet, etc.

⁴⁷¹ *Targeting Guns*, Gary Kleck, Aldine Transaction, 1997
Second Amendment

Justification clause: "A well regulated Militia being necessary to the security of a free State,"
Rights clause: "the right of the people to keep and bear Arms shall not be infringed."

The justification clause does not modify, restrict, or deny the rights clause.472

For a full discussion of how the Second Amendment was created and revised, see “Origin of the Second Amendment” at the bottom of this chapter.

Myth: The Supreme Court ruled the Second Amendment is not an individual right

Fact: In D.C. v Heller the Supreme Court (2008) firmly established the 2nd Amendment is an individual right, as they had in Cruikshank and Dred Scott.

Fact: In McDonald v Chicago (2010) the Supreme Court concluded the right is incorporated against the states via the 14th Amendment.

Fact: Of 300 decisions of the federal and state courts that have taken a position on the meaning of the Second Amendment or the state analogs to it, only 10 have claimed that the right to keep and bear arms is not an individual right. Many of the other decisions struck down gun control laws because they conflicted with the Second Amendment, such as State v. Nunn (Ga. 1846).473

Myth: The Second Amendment is a collective right, not an individual right

Fact: St. George Tucker, any early legal commentator and authority of the original meaning of the constitution wrote in Blackstone’s Commentaries “… nor will the constitution permit any prohibition of arms to the people” 474

Fact: The Second Amendment was listed in a Supreme Court ruling as an individual right.475

Fact: The Supreme Court specifically reaffirmed that the right to keep and bear arms did not belong to the government.476

472 Eugene Volokh, Prof. Law, UCLA
473 For the Defense of Themselves and the State: The Original Intent and Judicial Interpretation of the Right to Keep and Bear Arms, Clayton Cramer, Praeger Press, 1994
475 Dred Scott, Casey v. Planned Parenthood, U.S. v. Cruikshank and others
476 United States v. Miller
Fact: In 22 of the 27 instances where the Supreme Court mentions the Second Amendment, they quote the rights clause and not the justification clause.

Fact: Courts disagree. “We find that the history of the Second Amendment reinforces the plain meaning of its text, namely that it protects individual Americans in their right to keep and bear arms whether or not they are a member of a select militia or performing active military service or training” and “We reject the collective rights and sophisticated collective rights models for interpreting the Second Amendment”. 477

Fact: Citizens disagree. 62% believe the 2nd Amendment guarantees an individual right, while a mere 28% believe it protects the power of the states to form militias. 478

Fact: There are 23 state constitutions with RKBA clauses adopted between the Revolution and 1845, and 20 of them are explicitly individual in nature, only three have "for the common defense..." or other “collective rights” clauses. 479

Fact: James Madison, considered to be the author of the Bill of Rights, wrote that the Bill of Rights was "calculated to secure the personal rights of the people". He never excluded the Second Amendment from this statement.

Fact: Patrick Henry commented on the Swiss militia model (still in use today) noting that they maintain their independence without "a mighty and splendid President" or a standing army. 480

Fact: "The congress of the United States possesses no power to regulate, or interfere with the domestic concerns, or police of any state: it belongs not to them to establish any rules respecting the rights of property; nor will the constitution permit any prohibition of arms to the people; or of peaceable assemblies by them, for any purposes whatsoever, and in any number, whenever they may see occasion." 481

Fact: Tench Coxe, in Remarks on the First Part of the Amendments to the Federal Constitution said: “As civil rulers, not having their duty to the people duly before them, may attempt to tyrannize, and as the military forces which must be occasionally raised to defend our country, might pervert their power to the injury of their fellow-citizens, the people are confirmed by the next article in their right to keep and bear their private arms.”

480 Where Kids and Guns Do Mix, Stephen P. Halbrook, Wall Street Journal, June 2000
481 Blackstone’s Commentaries, St. George Tucker, Volume 1, Appendix Note D., 1803 – Tucker's comments provide a number of insights into the consensus for interpretation of the Constitution that prevailed shortly after its ratification, after the debates had settled down and the Constitution was put into practice.
Myth: The Heller Decision created new law

Fact: In the Dred Scott case of 1856, the Supreme Court listed the protected rights of citizens and explicitly listed the right to keep and bear arms, and gave this right equal weight to the other freedoms enumerated in the constitution.

Fact: In United States v. Cruikshank, 92 U.S. 542 (1876), the Supreme Court ruled:

- An individual right to arms predated the constitution.
- The Second Amendment was a prohibition against Congress from disarming citizens.

Myth: The Second Amendment was established to control slaves

Fact: The basis of the Second Amendment arose from the British disarming Americans in the time leading up to the revolution. The first state to declare a civilian right to arms (1776) was Pennsylvania, a non-slave state. Vermont (1777) and Massachusetts (1780) did so as well, and all this occurred before the Second Amendment was drafted. When slaves were emancipated, the Freedmen Bureau Act provided emancipated slaves “the constitutional right to bear arms.”

Myth: The "militia" clause is to arm the National Guard

Fact: “Militia” is a Latin abstract noun, meaning "military service", not an "armed group", and that is the way the Latin-literate Founders used it. To the Romans, "military service" included law enforcement and disaster response. Today “militia” might be more meaningfully translated as "defense service", associated with a "defense duty", which attaches to individuals as much as to groups of them, organized or otherwise. When we are alone, we are all militias of one. In the broadest sense, militia is the exercise of civic virtue.482

Fact: The Dick Act of 1903 designated the National Guard as the "organized militia" and that all other citizens were the "unorganized militia" – thus the National Guard is only part of the militia, and the whole militia is composed of the population at large. Before 1903, the National Guard had no federal definition as part of the militia at all.

Fact: The first half of the Second Amendment is called the "justification clause". Justification clauses appear in many state constitutions, and cover liberties including right to trial, freedom of the press, free speech, and more. Denying gun rights based on the justification clause means we would have to deny free speech rights on the same basis.483

---

482 Militia, The Constitution Society
483 Eugene Volokh, Prof. Law, UCLA, http://www2.law.ucla.edu/volokh/beararms/testimon.htm
Fact: The origin of the phrase "a well regulated militia" comes from a 1698 treatise "A Discourse of Government with Relation to Militias" by Andrew Fletcher, in which the term "well regulated" was equated with "well-behaved" or "disciplined". 484

Fact: “We have found no historical evidence that the Second Amendment was intended to convey militia power to the states, limit the federal government's power to maintain a standing army, or applies only to members of a select militia while on active duty. All of the evidence indicates that the Second Amendment, like other parts of the Bill of Rights, applies to and protects individual Americans." 485

Fact: “The plain meaning of the right of the people to keep arms is that it is an individual, rather than a collective, right and is not limited to keeping arms while engaged in active military service or as a member of a select militia such as the National Guard." 486

Fact: Most of the 13 original states (and many colonies/territories that became states after ratification of the Constitution and before or shortly after ratification of the Bill of Rights) had their own constitutions, and it is from these that the original Bill of Rights was distilled. The state constitutions of that time had many “right to keep and bear arms” clauses that clearly guaranteed an individual right. Some examples include: Connecticut: Every citizen has a right to bear arms in defense of himself and the state. Kentucky: … the right of the citizens to bear arms in defense of themselves and the State shall not be questioned. Pennsylvania: That the people have a right to bear arms for the defense of themselves and the state; … The right of the citizens to bear arms in defense of themselves and the State shall not be questioned. Rhode Island: The right of the people to keep and bear arms shall not be infringed. Vermont: … the people have a right to bear arms for the defense of themselves and the State.

Myth: U.S. v. Cruikshank denied an individual right to bear arms

Fact: The court ruled that both the 2nd Amendment right to bear arms and the 1st Amendment right to assembly were "preexisting rights", and that it was incumbent upon the states to enforce that right. Specifically the court ruled: The right was not created by the amendment; neither was its continuance guaranteed, except as against congressional interference. For their protection in its enjoyment, therefore, the people must look to the States. ...

484 This document was widely published during the colonial and revolutionary periods, and was the basis for state and federal 'bills of rights'

485 U.S. v. Emerson, 5th court of Appeals decision, November 2, 2001, No. 99-10331

486 U.S. v. Emerson, 5th court of Appeals decision, November 2, 2001, No. 99-10331
Myth: U.S. v. Miller said that the Second Amendment is not an individual right

Fact: The Miller case specifically held that specific types of guns might be protected by the Second Amendment. It depended on whether a gun had militia use, and the court wanted evidence presented confirming that citizens have a right to military style weapons. Since no evidence was taken at the trial level in lower courts, they remanded the case for a new trial. Specifically the court said: "The signification attributed to the term Militia appears from the debates in the Convention, the history and legislation of Colonies and States, and the writings of approved commentators. These show plainly enough that the Militia comprised all males physically capable of acting in concert for the common defense. "A body of citizens enrolled for military discipline." And further, that ordinarily when called for service these men were expected to appear bearing arms supplied by themselves and of the kind in common use at the time." “In the absence of any evidence tending to show that possession or use of a ‘shotgun having a barrel of less than 18 inches in length’ at this time has some reasonable relationship to the preservation or efficiency of a well-regulated militia, we cannot say that the Second Amendment guarantees the right to keep and bear such an instrument. Certainly it is not within judicial notice that this weapon is any part of the ordinary military equipment or that its use could contribute to the common defense.”

Fact: Even the US government agreed. Here are some sentences from the brief filed by the government in the appeal to the Supreme Court: “The Second Amendment does not grant to the people the right to keep and bear arms, but merely recognizes the prior existence of that right and prohibits its infringement by Congress.” “The ‘arms’ referred to in the Second Amendment are, moreover, those which ordinarily are used for military or public defense purposes ...” “The Second Amendment does not confer upon the people the right to keep and bear arms; it is one of the provisions of the Constitution which, recognizing the prior existence of a certain right, declares that it shall not be infringed by Congress. Thus the right to keep and bear arms is not a right granted by the Constitution and therefore is not dependent upon that instrument for its source.”

Fact: The Federal 8th Circuit Court of Appeals holds that the Miller case protects an individual right to keep and bear arms. “Although an individual's right to bear arms is constitutionally protected, see United States v. Miller ..."487

Fact: Federal courts reject the myth. “We conclude that Miller does not support the [government's] collective rights or sophisticated collective rights approach to the Second Amendment."488 They continue, “There is no evidence in the text of the Second Amendment, or any other part of the Constitution, that the words ‘we the people’ have a different connotation within the Second Amendment than when employed elsewhere ...”.

487 U.S. v. Hutzel, 8 Iowa, No. 99-3719
488 U.S. v. Emerson, 5th court of Appeals decision, November 2, 2001, No. 99-10331
Summary of various court decisions concerning gun rights

Decisions that explicitly recognized that the Second Amendment guarantees an individual right to purchase, possess or carry firearms, and it limits the authority of both federal and state governments:

- Parker vs. D.C., Fed (2007), confirmed an individual right to keep arms and overturning a handgun ban.
- U.S. vs. Emerson, 5 Fed (1999), confirmed an individual right requiring compelling government interest for regulation.
- Nunn v. State, 1 Ga. 243, 250, 251 (1846) (struck down a ban on sale of small, easily concealed handguns as violating Second Amendment).
- State v. Chandler, 5 La.An. 489, 490, 491 (1850) (upheld a ban on concealed carry, but acknowledged that open carry was protected by Second Amendment).
- Smith v. State, 11 La.An. 633, 634 (1856) (upheld a ban on concealed carry, but recognized as protected by Second Amendment "arms there spoken of are such as are borne by a people in war, or at least carried openly")).
- State v. Jumel, 13 La.An. 399, 400 (1858) (upheld a ban on concealed carry, but acknowledged a Second Amendment right to carry openly).
- Cockrum v. State, 24 Tex. 394, 401, 402 (1859) (upheld an enhanced penalty for manslaughter with a Bowie knife, but acknowledged that the Second Amendment guaranteed an individual right to possess arms for collective overthrow of the government).
- In Re Brickey, 8 Ida. 597, 70 Pac. 609, 101 Am.St.Rep. 215, 216 (1902) (struck down a ban on open carry of a revolver in Lewiston, Idaho as violating both Second Amendment and Idaho Const. guarantee).
- State v. Hart, 66 Ida. 217, 157 P.2d 72 (1945) (upheld a ban on concealed carry as long as open carry was allowed based on both Second Amendment and Idaho Const. guarantee).
- State v. Nickerson, 126 Mont. 157, 166 (1952) (striking down a conviction for assault with a deadly weapon, acknowledging a right to carry based on Second Amendment and Montana Const. guarantee).
Politicians

Bill Clinton, Former President of the United States

"Only the police should have handguns."

“When personal freedom's being abused, you have to move to limit it. That's what we did in the announcement I made last weekend on the public housing projects, about how we're going to have weapon sweeps.”

Fact: Wang Jun – son of the late Chinese President Wang Zhen – who is chairman of the China International Trade and Investment Company and President of Polytechnologies Corp., attended a White House coffee with Clinton in February 1996 and was granted a meeting with Commerce Secretary Ronald Brown the next day.

He was also connected to more than $600,000 in illegal campaign contributions to the Democrats, the report said. Polytechnologies is an arms-trading company indicted for trying to smuggle 2,000 Chinese AK-47 assault rifles into the United States and it is the largest of the corporate structures owned by the People's Liberation Army.

V.I. Lenin

"One man with a gun can control 100 without one. ... Make mass searches and hold executions for found arms."

Dianne Feinstein, U.S. Senator from California

"Banning guns addresses a fundamental right of all Americans to feel safe.""

"If I could have gotten 51 votes in the Senate of the United States for an outright ban, picking up every one of them; "Mr. and Mrs. America, turn 'em all in," I would have done it."

"The National Guard fulfills the militia mentioned in the Second amendment. Citizens no longer need to protect the states or themselves."

489 Enough is Enough, MTV, March 22, 1994
490 CNN May 24, 1999
491 Associated Press, November 18, 1993
492 60 Minutes, CBS, February 5, 1995
Joseph Stalin
"If the opposition disarms, well and good. If it refuses to disarm, we shall disarm it ourselves."

Frank Lautenberg, U.S. Senator from New Jersey
"We have other legislation that all of you are aware that I have been so active on, with my colleagues here, and that is to shut down the gun shows."493

Adolf Hitler
“The most foolish mistake we could possibly make would be to allow the subject races to possess arms. History shows that all conquerors who have allowed their subject races to carry arms have prepared their own downfall by so doing.”494

Gisela Kallenbach, German member of the European Parliament
"We in Europe … do not consider the freedom to buy weapons a human right."495

Howard Metzenbaum, former U.S. Senator
"No, we're not looking at how to control criminals ... we're talking about banning the AK-47 and semi-automatic guns."

Charles Pashayan, U.S. Representative from California
"All of this has to be understood as part of a process leading ultimately to a treaty that will give an international body power over our domestic laws."496

Pete Stark, U.S. Representative from California
"If a bill to ban handguns came to the house floor, I would vote for it."497

William Clay, U.S. Representative from Missouri
"...we need much stricter gun control, and eventually should bar the ownership of handguns"

493 Press conference on March 1, 2000
495 EU legislators push together gun controls, International Herald Tribune, November 29, 2007
496 United Nations Conference on Small Arms, 2001
497 Town Hall Meeting, June 1999, Fremont, California
Joseph Biden, Vice President of the United States

"Banning guns is an idea whose time has come."

John Chafee, Former U.S. Senator from Rhode Island

“I shortly will introduce legislation banning the sale, manufacture or possession of handguns (with exceptions for law enforcement and licensed target clubs). . . . It is time to act. We cannot go on like this. Ban them!”

Jan Schakowsky, U.S. Representative from Illinois

“I believe.....this is my final word......I believe that I'm supporting the Constitution of the United States which does not give the right for any individual to own a handgun...."

Major Owens, U.S. Representative from New York

“We have to start with a ban on the manufacturing and import of handguns. From there we register the guns which are currently owned, and follow that with additional bans and acquisitions of handguns and rifles with no sporting purpose.”

Bobby Rush, U.S. Representative from Illinois

"My staff and I right now are working on a comprehensive gun-control bill. We don't have all the details, but for instance, regulating the sale and purchase of bullets. Ultimately, I would like to see the manufacture and possession of handguns banned except for military and police use. But that's the endgame. And in the meantime, there are some specific things that we can do with legislation."

Ferdinand E. Marcos, Former President/Dictator of the Philippines

President Marcos declared Martial Law by virtue of Proclamation No.1081 on Sept.21, 1972 and on the following day issued General Order No. 6 declaring that no person shall keep, possess or carry any firearms with penalties ranging up to death. The Philippines was under his dictatorship for the next 14 years.

498 In View of Handguns' Effects, There's Only One Answer: A Ban, Minneapolis Star Tribune, June 15, 1992, at 13A
499 Tape recorded on June 25, 2000 by Matt Beauchamp at the Chicago Gay Pride Parade
500 Chicago Tribune, December 5, 1999
Acts of violence committed by members of gun control organizations

- Barbara Graham, speaker at the “Million Mom March” in 2000, was convicted of shooting and paralyzing for life a man she mistook as one who had killed her son.  
- In Fort Collins, a woman who opposes the right of self-defense struck a member of the Tyranny Response Team with a clipboard.  
- At a rally in Boulder early in 2000, Robert Howell, vice president of the anti-gun Boulder Bell Campaign, attacked Shariar Ghalam, bloodying his nose. (Ghalam was carrying a concealed handgun but never drew it, not believing his life was in danger.)  
- In the summer of 2000, supporters of the anti-gun Million Mom March stole supplies from the Second Amendment Sisters and vandalized SAS property.  
- Ari Armstrong, a pro-civil rights activist in Colorado, received threatening telephone calls allegedly from members of S.A.F.E (an anti-gun group) after Ari appeared on television promoting firearm freedoms.

Political activists

The Coalition to Stop Gun Violence

"It is our aim to ban the manufacture and sale of handguns to private individuals."  

“We will never fully solve our nation's horrific problem of gun violence unless we ban the manufacture and sale of handguns and semiautomatic assault weapons.”

Nelson T. “Pete” Shields, Chairman Emeritus, Handgun Control, Inc.

" .... the final problem is to make the possession of all handguns and all handgun ammunition except for the military, policemen, licensed security guards, licensed sporting clubs, and licensed gun collectors -- totally illegal.”

"Yes, I'm for an outright ban (on handguns).”

507 It is interesting to note that HCI was originally named National Council to Ban Handguns  
508 The New Yorker, July 26, 1976  
509 60 Minutes interview
"We'll take one step at a time, and the first is necessarily - given the political realities - very modest. We'll have to start working again to strengthen the law, and then again to strengthen the next law and again and again. Our ultimate goal, total control of handguns, is going to take time. The first problem is to slow down production and sales. Next is to get registration. The final problem is to make possession of all handguns and ammunition (with a few exceptions) totally illegal."510

Sarah Brady, Chairperson for Handgun Control, Inc. (now the Brady Campaign)

"...I don't believe gun owners have rights."511

"We would like to see, in the future, what we will probably call needs-based licensing of all weapons. ...Where it would make it much more difficult for anybody to be able to purchase handguns...."512

"To me, the only reason for guns in civilian hands is for sporting purposes."513

Jim Brady

“[Handguns] For target shooting, that’s okay. Get a license and go to the range. For defense of the home, that’s why we have police."514

Elliot Corbett, Secretary, National Council For A Responsible Firearms Policy

"Handguns should be outlawed."

Bernard Parks, Chief of Police, L.A.California

“We would get rid of assault weapons. There would not be an assault weapon in the United States, whether it's for a show or someone having it in a collection."515

Josh Sugarmann, Executive Director of the Violence Policy Center

“... immediately call on Congress to pass far-reaching industry regulation like the Firearms Safety and Consumer Protection Act ... [which] would give the Treasury Department health and

The media in general

A two-year study by the Media Research Center concluded that television reporters are overwhelmingly opposed to Second Amendment rights. For broadcasts from major networks from July 1, 1995 to June 30, 1997, covering 244 gun policy stories:

- The ratio of anti-gun to pro-gun bias was 16:1.
- Anti-gun spokespeople (Sarah Brady, etc.) were given three times the number of sound bites than pro-gun spokespeople (NRA, etc.).

The American government

The following exchange is from the appeal of the case of U.S. vs. Emerson in the Fifth Circuit Court. Meteja was the attorney for the U.S. Government.

Judge Garwood: [to federal lawyer] "You are saying that the Second Amendment is consistent with a position that you can take guns away from the public? You can restrict ownership of rifles, pistols and shotguns from all people? Is that the position of the United States?"

Meteja: [federal lawyer] "Yes"

Garwood: "Is it the position of the United States that persons who are not in the National Guard are afforded no protections under the Second Amendment?"

Meteja: Exactly.

Meteja then said that even membership in the National Guard isn't enough to protect the private ownership of a firearm. It wouldn't protect the guns owned at the home of someone in the National Guard.

Garwood: Membership in the National Guard isn't enough? What else is needed?

Meteja: The weapon in question must be used in the National Guard.

George Napper, Atlanta public-safety commissioner

"If I had my druthers, the only people who would have guns would be those who enforce the law."530

Janet Reno, former U.S. attorney general

"The most effective means of fighting crime in the United States is to outlaw the possession of any type of firearm by the civilian populace."531

530 U.S. News and World Report
Marion Barry, former mayor, Washington D.C.

"Our neighbors in Virginia are just as responsible for these killings as the criminals are because they won't pass strong gun [control] legislation."532 (ed: The claim being that citizens of Virginia were responsible for murders committed in Washington D.C.)

Gun Control Opponents

John F. Kennedy, President of the United States

"Today, we need a nation of Minutemen, citizens who are not only prepared to take arms, but citizens who regard the preservation of freedom as the basic purpose of their daily life and who are willing to consciously work and sacrifice for that freedom."

"By calling attention to 'a well regulated militia,' the 'security' of the nation, and the right of each citizen 'to keep and bear arms,' our founding fathers recognized the essentially civilian nature of our economy. Although it is extremely unlikely that the fears of governmental tyranny, which gave rise to the Second Amendment, will ever be a major danger to our nation, the Amendment still remains an important declaration of our basic civilian-military relationships, in which every citizen must be ready to participate in the defense of his country. For that reason I believe the Second Amendment will always be important."533

Mahatma Gandhi, Peaceful Revolutionary

“Among the many misdeeds of the British rule in India, history will look upon the Act depriving a whole nation of arms, as the blackest."

Aristotle

"Those who have the command of the arms in a country are masters of the state, and have it in their power to make what revolutions they please. [Thus,] there is no end to observations on the difference between the measures likely to be pursued by a minister backed by a standing army, and those of a court awed by the fear of an armed people."

The Dalai Lama

“If someone has a gun and is trying to kill you, it would be reasonable to shoot back with your own gun.”534

George Orwell

“The totalitarian states can do great things, but there is one thing they cannot do: they cannot give the factory-worker a rifle and tell him to take it home and keep it in his bedroom. That rifle, hanging on the wall of the working-class flat or laborer’s cottage, is the symbol of democracy. It is our job to see that it stays there.”

Hubert Humphrey, former U.S. Senator and Vice President of the United States

"Certainly one of the chief guarantees of freedom under any government, no matter how popular and respected, is the right of citizens to keep and bear arms.... The right of citizens to bear arms is just one guarantee against arbitrary government, one more safeguard against tyranny."

John Adams, President of the United States

“Resistance to sudden violence, for the preservation not only of my person, my limbs, and life, but of my property, is an indisputable right of nature which I have never surrendered to the public by the compact of society, and which perhaps, I could not surrender if I would.”

"Here, every private person is authorized to arm himself, and on the strength of this authority, I do not deny the inhabitants had a right to arm themselves at that time, for their defense, not for offense..."

St. George Tucker, American Revolution Major and Post Revolution Judge

"In America we may reasonably hope that the people will never cease to regard the right of keeping and bearing arms as the surest pledge of their liberty."

Walter Mondale, Former Vice President and U.S. Ambassador to Japan

"Gun bans don't disarm criminals, gun bans attract them."

Machiavelli

"The Swiss are well armed and enjoy great freedom"546

“From this we plainly see the folly and imprudence of demanding a thing, and saying beforehand that it is intended to be used for evil; … For it is enough to ask a man to give up his arms, without telling him that you intend killing him with them; after you have the arms in hand, then you can do your will with them.”547

Tenche Coxe, Revolutionary Era Writer

"As civil rulers, not having their duty to the people before them, may attempt to tyrannize, and as the military forces which must be occasionally raised to defend our country, might pervert their power to the injury of their fellow citizens, the people are confirmed by the article in their right to keep and bear their private arms."548

"Congress have no power to disarm the militia. Their swords, and every other terrible implement of the soldier, are the birthright of an American... The unlimited power of the sword is not in the hands of either the federal or state government, but, where I trust in God it will ever remain, in the hands of the people."549

Malcolm X, American Black Civil Rights Activist

"It is criminal to teach a man not to defend himself when he is the constant victim of brutal attacks. It is legal and lawful to own a shotgun or a rifle. We believe in obeying the law."550

“... I must say this concerning the great controversy over rifles and shotguns. The only thing I've ever said is that in areas where the government has proven itself either unwilling or unable to defend the lives and the property of Negroes, it's time for Negroes to defend themselves. Article number two of the constitutional amendments provides you and me the right to own a rifle or a shotgun. It is constitutionally legal to own a shotgun or a rifle."551

546 In Switzerland, males age 20 to 42 serving in the army are required to keep rifles or pistols at home

Samuel Adams, Member of the Continental Congress

"That the said Constitution shall never be construed to authorize Congress to infringe the just liberty of the press or the rights of conscience; or to prevent the people of The United States who are peaceable citizens from keeping their own arms..."552

William Rawle, Post-revolution U.S. Attorney

"The prohibition is general. No clause in the Constitution could by any rule of construction be conceived to give to Congress a power to disarm the people. Such a flagitious attempt could only be made under some general pretense by a state legislature. But if in any blind pursuit of inordinate power, either should attempt it, this amendment may be appealed to as a restraint on both."553

Thomas Paine, American Revolution Political Philosopher

"Arms, like laws, discourage and keep the invader and plunderer in awe and preserve order..."

Mafia informant Sammy "The Bull" Gravano

"Gun control? It's the best thing you can do for crooks and gangsters. I want you to have nothing. If I'm a bad guy, I'm always gonna have a gun. Safety locks? You will pull the trigger with a lock on, and I'll pull the trigger. We'll see who wins."

Richard Henry Lee, Member of the Continental Congress

“[W]hereas, to preserve liberty, it is essential that the whole body of the people always possess arms, and be taught alike, especially when young, how to use them;”554

Alexander Hamilton, Author of the Federalist papers

"The best we can hope for concerning the people at large is that they be properly armed."555

Zachariah Johnson, member of Virginia Constitution Ratifying Convention

"The people are not to be disarmed of their weapons. They are left in full possession of them."556

Miscellaneous Gun Control Information

Firearms in the United States

Nobody is sure of exactly how many firearms are in circulation. This stems from a long history of no regulations on firearm ownership. In Gun Facts, we rely on the estimates presented in *Targeting Guns*, which used estimates from before the creation of the federal Bureau of Alcohol, Tobacco and Firearms (BATF) augmented with their annual Firearms Commerce Reports. We have continued that approach in our own estimates. **Number of firearms in America:** Between 223,000,000\(^{560}\) and 290,000,000\(^{561}\) **Handguns in circulation:** 122,006,701 (2010) **Households with Firearms:** Between 40-50%. The number of households with firearms is impossible to accurately measure due to survey responses. Long ago criminologists noticed that women reporting a firearm in the home was much lower than men. This could mean any number of things, some being:

- Some women might not know there is a firearm in their house.
- Women don't like admitting guns are in their homes.
- Men lie in false bravado.

With the number of women admitting to firearm ownership rising, the first is considered most likely. This means that previous under reporting raises the percentages. Another problem is that some people do not like disclosing their own firearms. One survey, which concluded household firearm ownership was around 30% was conducted by the government. One explanation was that some people did not want their ownership recorded such that the government could take action (e.g. confiscation). If this it true for non-government surveys as well, the percentages rise even higher.

2,500,500 or 235,700 defensive gun uses (DGU)?

You may have heard that firearms are used 2.5 million times a year for self defense, and you may also have heard they are only used 235,700 times. The reason is that there are different sources of the data and different ways of measuring. The 2.5M times number come from criminologist Gary Kleck and his book *Targeting Guns*. Kleck gathered many surveys from both criminologists and media sources, and the midpoint was 2.5M DGUs a year (one of the surveys he reported was significantly higher and another one was lower, but most were in the 2-2.5M range). The 235,700 number comes from the National Crime Victimization Survey (NCVS). One important methodological difference in the NCVS is that it entails personal, face-to-face engagements with government employees (per their methodology documentation "all interviews are done by telephone whenever possible, except for the first interview, which is primarily

---

561 *Small Arms Survey*, Graduate Institute of International Studies, 2008
conducted in person"). There is also the potential for self-incrimination that may prevent reporting of some DGUs to this government survey. A victim may have a strong reluctance to talk to a government agent about a firearm brandishing incident (which are 98% of DGUs) because they may not know the act was 100% legal. Thus, to assure they are not victimized by the legal system, they avoid reporting DGUs to this government survey. Another criticism of the NCVS is that questions concerning gun-use are never asked unless the interviewee first indicates that they were "a victim of a crime." Since some people who successfully avoid being a victim by using a gun reply that they have not been victimized, they are never asked the question about use of a firearm. Because of this, some criminologists believe there is a self-reporting bias in the NCVS (e.g., people don't like to tell the government they own or used a gun). Thus, this low number from the NCVS is considered to be an outlier and not reliable compared to other, broader and more standardized measures.

**British Crime Statistics**

The U.K. measures crime using two different processes:

**British Crime Survey (BCS):** The Home Office conducts surveys of the population to determine how often subjects have been affected by criminal activity. Data is projected to reflect the entire population. **Police reporting:** Crimes are reported to the police and nationwide, census-level statistics are summarized.

The BCS has been reporting a declining crime rate in the UK while police reporting has shown an increase. The BCS has routinely been criticized because it under reports crime due to the following factors:

- Murdered and imprisoned people do not answer surveys
- Some crimes are not surveyed when victims are below age 16
- Crime against institutions (bank robbery, etc.) are not included
- Crimes are recorded at final disposition (conviction/acquittal), leaving many crimes completely unreported

These deficiencies are so significant that even the British government does not believe the accuracy of the BCS.

"[T]he BCS did not record ‘various categories of violent crime’, including murder and rape, retail crime, drug-taking, or offences in which the victims were aged below 16. The most reliable measure of crime is that which is reported to the police. We're facing over a million violent crimes a year for the first time in history."

Gun control groups tend to cite the BCS reports because it supports their narrative that Britain's gun control laws lower crime. Criminologists tend to use the reporting system because it more

---

562 This is a serious omission as most gang crime is committed by and against young people.
563 *Fear in Britain*, Dr. Paul Gallant and Dr. Joanne Eisen, National Review, July 18, 2000
564 *Row over figures as crime drops 5%*, David Davis, Shadow Home Secretary, The Guardian, July 22, 2004
closely matches the FBI Uniform Crime Statistics used in the United States. One curious tidbit: Murder rates initially appear to decline after 2002/2003. This is chiefly due to the scores of killings attributed to serial killer, Dr. Harold Frederick Shipman, which were booked in 2002/03 and did not recur in 2003/04. More curious are the sudden leaps in reported violent crime when the British Home Office enforced standardized methods for recording reported crime (which led the Home Office to claim crime reports to be of poor quality, and thus rely on the suspect survey mechanism): The 1998 changes to the Home Office Counting Rules had a very significant impact on violent crime; the numbers of such crimes recorded by the police increased by 83 per cent as a result of the 1998 changes … The National Crime Recording Standard (NCRS), introduced in April 2002, again resulted in increased recording of violent crimes particularly for less serious violent offences.565

Confused terms in gun control policy

Assault rifle and assault weapon:

Assault rifles are real, and are a specific type of military weapon classified by the Department of Defense. These are not generally available to the public. Assault weapons are a legislative term, and means whatever the law says. In a paper promoting the extension of the federal assault weapons ban, the Law Center to Prevent Gun Violence admitted that various "assault weapons" laws across the nation covered anywhere from 19 to 75 banned firearms, six differing generic classification schemes and several legal systems for banning more firearms without specific legislative action.

Negligent discharge and accidental shooting

Negligent discharges are defined as "a discharge of a firearm involving culpable carelessness." In other words, a person did not have their firearm properly secured or handled it in a careless fashion. Accidental shootings include negligent discharges, but include other activities such as unintended targets, people walking into a line of fire, down-range hunting accidents and more.

Genocide and Gun Control566

Outside of war, the greatest loss of human life in the 20th century came from governments. In nearly every case, disarmament preceded mass murder. Though some nations have been functionally disarmed without such atrocities, it is worth remembering:

- In 1911, Turkey established gun control. Subsequently, from 1915 to 1917, 1.5-million Armenians, deprived of the means to defend themselves, were rounded up and killed.
- In 1929, the Soviet Union established gun control. Then, from 1929 to 1953, approximately 20-million dissidents were rounded up and killed.

566 Death by Gun Control: The Human Cost of Victim Disarmament,” Aaron Zelman & Richard W. Stevens, 2001
• In 1938 Germany established gun control. From 1939 to 1945 over 13-million Jews, gypsies, homosexuals, mentally ill, union leaders, Catholics and others, unable to fire a shot in protest, were rounded up and killed.

• In 1935, China established gun control. Subsequently, between 1948 and 1952, over 20-million dissidents were rounded up and killed.

• In 1956, Cambodia enshrined gun control. In just two years (1975-1977) over one million "educated" people were rounded up and killed.

• In 1964, Guatemala locked in gun control. From 1964 to 1981, over 100,000 Mayan Indians were rounded up and killed as a result of their inability to defend themselves.

• In 1970, Uganda embraced gun control. Over the next nine years over 300,000 Christians were rounded up and killed.

Over 56-million people have died because of gun control in the last century.
